■the main figure or one of the most prominent figures in a real situation: *in this colonial struggle the main protagonists were Great Britain and France.* ■ an advocate or champion of a particular cause or idea: *a strenuous protagonist of the new agricultural policy.*

– ORIGIN late 17th cent.: from Greek *prōtagōnistēs*, from *prōtos* 'first in importance' + *agōnistēs* 'actor'.

USAGE The first sense of **protagonist**, as originally used in connection with ancient Greek drama, is 'the main character in a play'. In the early 20th century a new sense arose meaning 'a supporter of a cause', as in *a strenuous* ***protagonist*** *of the new agricultural policy*. This new sense probably arose by analogy with **antagonist**, the **pro-** in **protagonist** being interpreted as meaning 'in favour of'. In fact, the **prot-** in **protagonist** derives from the Greek root meaning 'first'. For this reason some traditionalists regard the newer use as incorrect, although it is now widely accepted in standard English.

quantitative analysis ▶ **noun** [mass noun] Chemistry measurement of the quantities of particular constituents present in a substance.

quantitative linguistics ▶ **plural noun** [treated as sing.] the comparative study of the frequency and distribution of words and syntactic structures in different texts.

quantitive ▶ **adjective** another term for **QUANTITATIVE**.
– DERIVATIVES **quantitively** adverb.

quantity ▶ **noun** (pl. **-ies**) **1** [mass noun] the amount or number of a material or immaterial thing not usually estimated by spatial measurement: *the quantity and quality of the fruit can be controlled* | [count noun] *note down the sizes, colours, and quantities that you require.*
■ a certain, usually specified, amount or number of something: *a small quantity of food* | *if taken in large quantities, the drug can result in liver failure.* ■ (often **quantities**) a considerable number or amount of something: *she was able to drink quantities of beer without degenerating into giggles* | [mass noun] *many people like to buy in quantity.*
2 [mass noun] Phonetics the perceived length of a vowel sound or syllable.
3 [mass noun] Mathematics & Physics a value or component that may be expressed in numbers.
■ [count noun] the figure or symbol representing this.
– ORIGIN Middle English: from Old French *quantite*, from Latin *quantitas* (translating Greek *posotēs*), from *quantus* 'how great, how much'.

quantity surveyor ▶ **noun** Brit. a person who calculates the amount of materials needed for building work, and how much they will cost.

quantity theory (also **the quantity theory of money**) ▶ **noun** [mass noun] Economics the hypothesis that changes in prices correspond to changes in the monetary supply.

quantize (also **-ise**) ▶ **verb** [with obj.] **1** Physics form into quanta, in particular restrict the number of possible values of (a quantity) or states of (a system) so that certain variables can assume only certain discrete magnitudes.
2 Electronics approximate (a continuously varying signal) by one whose amplitude is restricted to a prescribed set of values.
– DERIVATIVES **quantization** noun, **quantizer** noun (only in sense 2).

quantum /'kwɒntəm/ ▶ **noun** (pl. **quanta** /-tə/)
1 Physics a discrete quantity of energy proportional in magnitude to the frequency of the radiation it represents.
■ an analogous discrete amount of any other physical quantity, such as momentum or electric charge. ■ Physiology the unit quantity of acetylcholine released at a neuromuscular junction by a single synaptic vesicle, contributing a discrete small voltage to the measured end-plate potential.
2 a required or allowed amount, especially an amount of money legally payable in damages.
■ a share or portion: *each man has only a quantum of compassion.*
– ORIGIN mid 16th cent. (in the general sense 'quantity'): from Latin, neuter of *quantus* (see **QUANTITY**). Sense 1 dates from the early 20th cent.

quantum chromodynamics (abbrev.: **QCD**) ▶ **plural noun** [treated as sing.] Physics a quantum field theory in which the strong interaction is described in terms of an interaction between quarks mediated by gluons, both quarks and gluons being assigned a quantum number called 'colour'.

quantum electrodynamics ▶ **plural noun** [treated as sing.] a quantum field theory that deals with the electromagnetic field and its interaction with electrically charged particles.

quantum field theory ▶ **noun** Physics a field theory that incorporates quantum mechanics and the principles of the theory of relativity.

quantum gravity ▶ **noun** [mass noun] Physics a theory that attempts to explain gravitational physics in terms of quantum mechanics.

quantum jump ▶ **noun** Physics an abrupt transition of an electron, atom, or molecule from one quantum state to another, with the absorption or emission of a quantum.
■ another term for **QUANTUM LEAP**.

quantum leap ▶ **noun** a sudden large increase or advance: *there has been a quantum leap in the quality of wines marketed in the UK.*

quantum mechanics ▶ **plural noun** [treated as sing.] Physics the branch of mechanics that deals with the mathematical description of the motion and interaction of subatomic particles, incorporating the concepts of quantization of energy, wave–particle duality, the uncertainty principle, and the correspondence principle.
– DERIVATIVES **quantum-mechanical** adjective.

quantum meruit /ˌkwɒntəm 'meruɪt/ ▶ **noun** [mass noun] [usu. as modifier] Law a reasonable sum of money to be paid for services rendered or work done when the amount due is not stipulated in a legally enforceable contract.
– ORIGIN Latin, literally 'as much as he has deserved'.

quantum number ▶ **noun** Physics a number which occurs in the theoretical expression for the value of some quantized property of a subatomic particle, atom, or molecule and can only have certain integral or half-integral values.

quantum state ▶ **noun** Physics a state of a quantized system which is described by a set of quantum numbers.

quantum theory ▶ **noun** [mass noun] Physics a theory of matter and energy based on the concept of quanta, especially quantum mechanics.

Quapaw /'kwɔːpɔː/ ▶ **noun** (pl. same or **Quapaws**)
1 a member of an American Indian people of the Arkansas River region, now living mainly in NE Oklahoma.
2 [mass noun] the extinct Siouan language of this people.

Although ideas of race are centuries old, it was not until the 19th century, with the growth of interest in ethnology and physical anthropology, that attempts to systematize racial divisions were made. Ideas of supposed racial superiority and social Darwinism reached their culmination in Nazi ideology of the 1930s and gave pseudoscientific justification to policies and attitudes of discrimination, exploitation, slavery, and extermination. Theories of race asserting a link between racial type and intelligence are now discredited. Scientifically it is accepted as obvious that there are subdivisions of the human species, but it is also clear that genetic variation between individuals of the same race can be as great as that between members of different races.

– ORIGIN early 16th cent. (denoting a group with common features): via French from Italian *razza*, of unknown ultimate origin.

USAGE In recent years, the associations of **race** with the ideologies and theories that grew out of the work of 19th-century anthropologists and physiologists has led to the use of the word **race** itself becoming problematic. Although still used in general contexts, it is now often replaced by other words which are less emotionally charged, such as **people(s)** or **community**.

USAGE The relationship between the forms **rack** and **wrack** is complicated. The most common noun sense of **rack** 'a framework for holding and storing things' is always spelled **rack**, never **wrack**. The figurative senses of the verb, deriving from the type of torture in which someone is stretched on a **rack**, can, however, be spelled either **rack** or **wrack**: thus ***racked with guilt*** or ***wracked with guilt***; ***rack your brains*** or ***wrack your brains***; ***the bank was racked by internal division*** or ***the bank was wracked by internal division***. In addition, the phrase **rack and ruin** can also be spelled **wrack and ruin**. In the contexts mentioned here as having the variant **wrack**, **rack** is always the commoner spelling.

▶ **rack something up** accumulate or achieve something, typically a score or amount: *Japan is racking up record trade surpluses with the United States.*

rack[2] ▶ **noun** a horse's gait in which both hoofs on either side in turn are lifted almost simultaneously, and all four hoofs are off the ground together at certain moments.

racket-tail (also **racquet-tail**) ▶ ***noun*** a South American hummingbird with long racket-shaped tail feathers.

● Genera *Ocreatus* and *Loddigesia*, family Trochilidae: two species.

■ any of a number of other birds, in particular certain parrots, drongos, and motmots, with racket-shaped tails.

Rackham /'rakəm/, Arthur (1867–1939), English *illustrator, noted for his illustrations of books such* as the Grimm brothers' *Fairy Tales* (1900) and *Peter Pan* (1906).

rack mounting ▶ **noun** [mass noun] [usu. as modifier] the use of the standardized racks for supporting electrical or electronic equipment.

– DERIVATIVES **rack-mount** adjective, **rack-mounted** adjective.

rack railway ▶ **noun** a railway with a toothed rail between the bearing rails which engages with a cogwheel under the locomotive, for very steep slopes.

rack rent ▶ **noun** an extortionate or very high rent.

▶ **verb** (**rack-rent**) [with obj.] dated exact an excessive or extortionate rent *from* (a tenant) *or for* (a property).

– DERIVATIVES **rack-renter** noun.

– ORIGIN late 16th cent. (as *rack-rented*): from the verb **RACK**[1] (in the sense 'cause stress') + the noun **RENT**[1].

raclette /ra'klɛt/ ▶ **noun** [mass noun] a Swiss dish of melted cheese, typically eaten with potatoes.

– ORIGIN French, literally 'small scraper', referring to the practice of holding the cheese over the heat and scraping it on to a plate as it melts.

racon /'reɪkɒn/ ▶ **noun** chiefly US a radar beacon that can be identified and located by its response to a specific radar signal.

– ORIGIN 1940s: blend of **RADAR** and **BEACON**.

raconteur /ˌrakɒn'tɜː/ ▶ **noun** a person who tells anecdotes in a skilful and amusing way.

– ORIGIN early 19th cent.: French, from *raconter* 'relate, recount'.

raconteuse /ˌrakɒn'tɜːz/ ▶ **noun** a female raconteur.

– ORIGIN mid 19th cent.: French, feminine of *raconteur* (see **RACONTEUR**).

racoon ▶ **noun** variant spelling of **RACCOON**.

racquet ▶ **noun** variant spelling of **RACKET**[1].

racy ▶ **adjective** (**racier**, **raciest**) (of speech, writing, or behaviour) lively, entertaining, and typically mildly sexually titillating: *the novel was considered rather racy at the time.*

■ (of a person or thing) showing vigour or spirit: *a racy fiddle.* ■ (of a wine, flavour, etc.) having a characteristic quality in a high degree. ■ (of a vehicle or animal) designed or bred to be suitable for racing: *the yacht is fast and racy.*

– DERIVATIVES **racily** adverb, **raciness** noun.

RAD ▶ **abbreviation for** (in the UK) Royal Academy of Dance.

rad[1] ▶ **abbreviation for** radian(s).

rad[2] ▶ **noun** informal a political radical.

– ORIGIN early 19th cent.: abbreviation.

rad[3] ▶ **noun** Physics a unit of absorbed dose of ionizing radiation, corresponding to the absorption of 0.01 joule per kilogram of absorbing material.

– ORIGIN early 20th cent.: acronym from *radiation absorbed dose*.

rad[4] ▶ **adjective** informal, chiefly US excellent; impressive: *his style is so rad | a really rad game.*

– ORIGIN 1980s: probably an abbreviation of **RADICAL**.

rad[5] ▶ **noun** short for **RADIATOR**.

RADA /'rɑːdə/ ▶ **abbreviation for** (in the UK) Royal Academy of Dramatic Art.

radar ▶ **noun** [mass noun] a system for detecting the presence, direction, distance, and speed of aircraft, ships, and other objects, by sending out pulses of high-frequency electromagnetic waves which are reflected off the object back to the source.

■ [count noun] an apparatus used for this.

– ORIGIN 1940s: from *ra(dio) d(etection) a(nd) r(anging)*.

radar gun ▶ **noun** a hand-held device used by traffic police to estimate the speed of a passing vehicle.

radar trap ▶ **noun** an area of road in which radar is used by the police to detect vehicles exceeding a speed limit.

RADC ▶ **abbreviation for** (in the UK) Royal Army Dental Corps.

Radcliffe, Mrs Ann (1764–1823), English novelist, a leading exponent of the Gothic novel. Notable works: *The Mysteries of Udolpho* (1794) and *The Italian* (1797).

raddle ▶ **noun** another term for **REDDLE**.

■ [count noun] a block or stick of reddle.

▶ **verb** [with obj.] colour (someone or something) with reddle.

– ORIGIN early 16th cent.: related to **RED**; compare with **RUDDLE**.

raddled ▶ **adjective 1** (of a person or their face) showing signs of age or fatigue: *he's beginning to look quite raddled.*

2 coloured with or as if with raddle: *raddled sheep.*

Radha /'rɑːdɑː, 'rɑːðɑː/ Hinduism the favourite *mistress of the god Krishna, and an incarnation of* Lakshmi.

– ORIGIN from Sanskrit, literally 'prosperity'.

Radhakrishnan /ˌrɑːdə'krɪʃnən/, Sir Sarvepalli (1888–1975), Indian philosopher and statesman, President 1962–7. He introduced classical Indian philosophy to the West through works such as *Indian Philosophy* (1923–7).

radial ▶ **adjective 1** of or arranged like rays or the radii of a circle; diverging in lines from a common centre.

■ (of a road or route) running directly from a town or city centre to an outlying district. ■ (also **radial-ply**) denoting a tyre in which the layers of fabric have their cords running at right angles to the circumference of the tyre and the tread is strengthened by further layers round the circumference. ■ denoting an internal-combustion engine with its cylinders fixed like the spokes of a wheel around a rotating crankshaft (a type used chiefly in aircraft).

2 Anatomy & Zoology of or relating to the radius.

▶ ***noun*** **1** a radial tyre.

2 a radial road.

3 Zoology a supporting ray in a fish's fin.

4 a radial engine.

– DERIVATIVES **radially** adverb.

– ORIGIN late 16th cent.: from medieval Latin *radialis*, from Latin *radius* (see **RADIUS**).

radial keratotomy ▶ **noun** see **KERATOTOMY**.

radial symmetry ▶ **noun** [mass noun] chiefly Biology symmetry about a central axis, as in a starfish or a tulip flower.

radial velocity ▶ **noun** chiefly Astronomy the velocity of a star or other body along the line of sight of an observer.

radian /'reɪdɪən/ ▶ **noun** Geometry a unit of angle, equal to an angle at the centre of a circle the arc of which is equal in length to the radius.

radiance ▶ **noun** [mass noun] **1** light or heat as emitted or reflected by something: *the radiance of the sunset dwindled and died.*

■ great joy or love, apparent in someone's expression or bearing: *the radiance of the bride's smile.* ■ a glowing quality of the skin, especially as indicative of good health or youth.

2 Physics the flux of radiation emitted per unit solid angle in a given direction by a unit area of a source.

radiant ▶ **adjective 1** sending out light; shining or glowing brightly: *a bird with radiant green and red plumage.*

■ (of a person or their expression) clearly emanating great joy, love, or health: *she gave him a radiant smile.* ■ (of an emotion or quality) emanating powerfully from someone or something; very intense or conspicuous: *he praised her radiant self-confidence.*

2 [attrib.] (of electromagnetic energy, especially heat) transmitted by radiation, rather than conduction or convection.

■ (of an appliance) designed to emit such energy, especially for cooking or heating.

▶ ***noun*** a point or object from which light or heat radiates, especially a heating element in an electric or gas heater.

■ Astronomy a radiant point.

– DERIVATIVES **radiancy** noun, **radiantly** adverb.

– ORIGIN late Middle English: from Latin *radiant-* 'emitting rays', from the verb *radiare* (see **RADIATE**).

radiant point ▶ **noun** a centre point from which rays or radii proceed.

■ Astronomy the apparent focal point of a meteor shower.

radiate ▶ **verb 1** [with obj.] emit (energy, especially light or heat) in the form of rays or waves: *the hot stars radiate energy.*

■ [no obj., with adverbial of direction] (of light, heat, or other energy) be emitted in such a way: *the continual stream of energy which radiates from the sun.* ■ (of a person) clearly emanate (a strong feeling or quality) through their expression or bearing: *she lifted her chin, radiating defiance.* ■ (**radiate from**) (of a feeling or quality) emanate clearly from: *leadership and confidence radiate from her.*

2 [no obj., with adverbial of direction] diverge or spread from or as if from a central point: *he ran down one of the passages that radiated from the room.*
■ Biology (of an animal or plant group) evolve into a variety of forms adapted to new situations or ways of life.
▶ **adjective** rare having rays or parts proceeding from a centre; arranged in or having a radial pattern: *the radiate crown.*
– DERIVATIVES **radiative** adjective (only in sense 1).
– ORIGIN early 17th cent.: from Latin *radiat-* 'emitted in rays', from the verb *radiare*, from *radius* 'ray, spoke'.

radiated ▶ **adjective** [attrib.] **1** (of light, heat, or other energy) emitted by radiation.
2 used in names of animals with markings arranged like rays, e.g. **radiated tortoise**.

radiation ▶ **noun** [mass noun] **1** Physics the emission of energy as electromagnetic waves or as moving subatomic particles, especially high-energy particles which cause ionization.
■ the energy transmitted in this way.
2 chiefly Biology divergence out from a central point, in particular evolution from an ancestral animal or plant group into a variety of new forms.
– DERIVATIVES **radiational** adjective, **radiationally** adverb.
– ORIGIN late Middle English (denoting the action of sending out rays of light): from Latin *radiatio(n-)*, from *radiare* 'emit rays' (see **RADIATE**).

radiation belt ▶ **noun** Astronomy a region surrounding a planet where charged particles accumulate under the influence of the planet's magnetic field.

radiation chemistry ▶ **noun** [mass noun] the branch of chemistry concerned with the effects of radiation on matter.

radiation pattern ▶ **noun** Physics the directional variation in intensity of the radiation from an aerial or other source.

radiation sickness ▶ **noun** [mass noun] illness caused by exposure of the body to ionizing radiation, characterized by nausea, hair loss, diarrhoea, bleeding, and damage to the bone marrow and central nervous system.

radiation therapy (also **radiation treatment**) ▶ **noun** another term for **RADIOTHERAPY**.

radiator ▶ **noun** **1** a thing that radiates or emits light, heat, or sound.
■ a device for heating a room consisting of a metal case connected by pipes through which hot water is pumped by a central heating system. ■ a portable oil or electric heater resembling such a device.
2 an engine-cooling device in a motor vehicle or aircraft consisting of a bank of thin tubes in which circulating water is cooled by the surrounding air.

radiator grille ▶ **noun** a grille at the front of a motor vehicle allowing air to circulate to the radiator to cool it.

radical ▶ **adjective** **1** (especially of change or action) relating to or affecting the fundamental nature of something; far-reaching or thorough: *a radical overhaul of the existing regulatory framework.*
■ forming an inherent or fundamental part of the nature of someone or something: *the assumption of radical differences between the mental attributes of literate and non-literate peoples.* ■ (of surgery or medical treatment) thorough and intended to be completely curative. ■ characterized by departure from tradition; innovative or progressive: *the city is known for its radical approach to transport policy.*
2 advocating thorough or complete political or social reform; representing or supporting an extreme or progressive section of a political party: *a radical American activist.*
■ (of a measure or policy) following or based on such principles. ■ Brit. historical belonging to an extreme section of the Liberal party during the 19th century.
3 of or relating to the root of something, in particular:
■ Mathematics of the root of a number or quantity. ■ denoting or relating to the roots of a word. ■ Music belonging to the root of a chord. ■ Botany of, or springing direct from, the root or stem base of a plant.
4 [usu. as exclamation] informal, chiefly US very good; excellent: *Okay, then. Seven o'clock. Radical!*
▶ **noun** **1** a person who advocates thorough or complete political or social reform; a member of a political party or part of a party pursuing such aims.
2 Chemistry a group of atoms behaving as a unit in a number of compounds. See also **FREE RADICAL**.
[ORIGIN: early 19th cent.: from French.]
3 the root or base form of a word.
■ any of the basic set of approximately 214 Chinese characters constituting semantically or functionally significant elements in the composition of other characters and used as a means of classifying characters in dictionaries.
4 Mathematics a quantity forming or expressed as the root of another.
■ a radical sign.
– DERIVATIVES **radicalism** noun (only in sense 2 of the noun), **radically** adverb [as submodifier] *a radically different approach*, **radicalness** noun.
– ORIGIN late Middle English (in the senses 'forming the root' and 'inherent'): from late Latin *radicalis*, from Latin *radix, radic-* 'root'.

radical chic ▶ **noun** [mass noun] the fashionable affectation of radical left-wing views.
■ the dress, lifestyle, or people associated with this.
– ORIGIN 1970: coined by the American writer, Tom Wolfe.

radicalize (also **-ise**) ▶ **verb** [with obj.] cause (someone) to become an advocate of radical political or social reform: *some of those involved had been radicalized by the Vietnam War.*
■ initiate or introduce fundamental or far-reaching changes in: *the push to radicalize 16–19 science education.*
– DERIVATIVES **radicalization** noun.

radical sign ▶ **noun** Mathematics the sign √ which indicates the square root of the number following (or a higher root indicated by a preceding superscript numeral).

radicchio /ra'di:kɪəʊ/ ▶ **noun** (pl. **-os**) chicory of a variety which has dark red leaves.
– ORIGIN Italian.

radices plural form of **RADIX**.

radicle /'radɪk(ə)l/ ▶ **noun** Botany the part of a plant embryo that develops into the primary root.
■ Anatomy a root-like subdivision of a nerve or vein.
– DERIVATIVES **radicular** adjective (Anatomy).
– ORIGIN late 17th cent.: from Latin *radicula*, diminutive of *radix, radic-* 'root'.

radii plural form of **RADIUS**.

radio ▶ **noun** (pl. **-os**) [mass noun] the transmission and reception of electromagnetic waves of radio frequency, especially those carrying sound messages: *cellular phones are linked by radio rather than wires.*
■ the activity or industry of broadcasting sound programmes to the public: *she has written much material for radio* | [as modifier] *a radio station.* ■ radio programmes: *we used to listen to a lot of radio.* ■ [count noun] an apparatus for receiving such programmes: *he switched the radio on.* ■ [count noun] an apparatus capable of both receiving and transmitting radio messages between individuals, ships, planes, etc.: *a ship-to-shore radio.* ■ [in names] a broadcasting station or channel: *Radio One.*
▶ **verb** (**-oes**, **-oed**) [no obj.] communicate or send a message by radio: *the pilot radioed for help.*
■ [with obj.] communicate with (a person or place) by radio: *we'll radio Athens right away.*
– ORIGIN early 20th cent.: abbreviation of **RADIOTELEPHONY**.

radio- ▶ **combining form** **1** denoting radio waves or broadcasting: *radio-controlled* | *radiogram.*
2 Physics connected with rays, radiation, or radioactivity: *radiogenic* | *radiograph.*
■ denoting artificially prepared radioisotopes of elements: *radio-cobalt.*
3 Anatomy belonging to the radius in conjunction with some other part: *radio-carpal.*
– ORIGIN from **RADIO** or **RADIUS**.

radioactive ▶ **adjective** emitting or relating to the emission of ionizing radiation or particles: *radioactive decay* | *the water was radioactive.*
– DERIVATIVES **radioactively** adverb.

radioactivity ▶ **noun** [mass noun] the emission of ionizing radiation or particles caused by the spontaneous disintegration of atomic nuclei.
■ radioactive substances, or the radiation emitted by these.

radio amateur ▶ **noun** a person whose hobby is picking up, and generally also transmitting, radio messages.

radio astronomy ▶ **noun** [mass noun] the branch of astronomy concerned with radio emissions from celestial objects.

radiobiology ▶ **noun** [mass noun] the branch of biology concerned with the effects of ionizing radiation on organisms and the application in biology of radiological techniques.
– DERIVATIVES **radiobiological** adjective, **radiobiologically** adverb, **radiobiologist** noun.

radio button ▶ **noun** Computing (in a graphical display) an icon representing one of a set of options, only one of which can be selected at any time.

radio car ▶ **noun** a car, especially a police car, equipped with a two-way radio.

radiocarbon ▶ **noun** [mass noun] Chemistry a radioactive isotope of carbon.

radiocarbon dating ▶ **noun** another term for **CARBON DATING**.

radiochemistry ▶ **noun** [mass noun] the branch of chemistry concerned with radioactive substances.
– DERIVATIVES **radiochemical** adjective, **radiochemist** noun.

radio-controlled ▶ **adjective** (especially of an electronic model toy) controllable from a distance by radio.

radio-element ▶ **noun** a radioactive element or isotope.

radio frequency ▶ **noun** a frequency or band of frequencies in the range 10^4 to 10^{11} or 10^{12} Hz, suitable for use in telecommunications.

radio galaxy ▶ **noun** a galaxy emitting radiation in the radio-frequency range of the electromagnetic spectrum.

radiogenic /ˌreɪdɪə(ʊ)'dʒɛnɪk, -'dʒi:n-/ ▶ **adjective** **1** produced by radioactivity: *a radiogenic isotope.*
2 well suited in style or subject for broadcasting by radio: *a radiogenic series.*
– DERIVATIVES **radiogenically** adverb.

radio-goniometer ▶ **noun** an instrument for finding direction using radio waves.

radiogram ▶ **noun** **1** Brit. a combined radio and record player built into a cabinet with a speaker.
[ORIGIN: from **RADIO-** + **GRAMOPHONE**.]
2 another term for **RADIOGRAPH**.
3 a radio-telegram.

radiograph ▶ **noun** an image produced on a sensitive plate or film by X-rays, gamma rays, or similar radiation, and typically used in medical examination.
▶ **verb** [with obj.] produce an image of (something) on a sensitive plate or film by X-rays, gamma rays, or similar radiation.
– DERIVATIVES **radiographer** noun, **radiographic** adjective, **radiographically** adverb, **radiography** noun.

radio ham ▶ **noun** see **HAM²** (in sense 2).

radioimmunoassay ▶ **noun** Medicine a technique for determining antibody levels by introducing an antigen labelled with a radioisotope and measuring the subsequent radioactivity of the antibody component.

radioimmunology ▶ **noun** [mass noun] the use of radioactively labelled antigens and antibodies in medical and biological research.
– DERIVATIVES **radioimmunological** adjective, **radioimmunologically** adverb.

radioisotope ▶ **noun** Chemistry a radioactive isotope.
– DERIVATIVES **radioisotopic** adjective.

radiolaria /ˌreɪdɪə(ʊ)'lɛ:rɪə/ ▶ **plural noun** Zoology radiolarians collectively.
– ORIGIN late 19th cent.: modern Latin (former order name), from late Latin *radiolus* 'faint ray', diminutive of *radius* 'ray'.

radiolarian Zoology ▶ **noun** a single-celled aquatic animal which has a spherical amoebalike body with a spiny skeleton of silica. Their skeletons can accumulate as a slimy deposit on the seabed.
● Three classes of the phylum Actinopoda, kingdom Protista (formerly subclass or order Radiolaria).
▶ **adjective** of, relating to, or formed from radiolarians.

radiology ▶ **noun** [mass noun] the science dealing with X-rays and other high-energy radiation, especially the use of such radiation for the diagnosis and treatment of disease.
– DERIVATIVES **radiologic** adjective, **radiological** adjective, **radiologically** adverb, **radiologist** noun.

radiolucent /ˌreɪdɪəʊˈluːsənt/ ▶ **adjective** transparent to X-rays.
– DERIVATIVES **radiolucency** noun.

radiometer /ˌreɪdɪˈɒmɪtə/ ▶ **noun** an instrument for detecting or measuring the intensity or force of radiation.
– DERIVATIVES **radiometry** noun.

radiometric ▶ **adjective** Physics of or relating to the measurement of radioactivity.
– DERIVATIVES **radiometrically** adverb.

radiometric dating ▶ **noun** [mass noun] a method of dating geological specimens by determining the relative proportions of particular radioactive isotopes present in a sample.

radionics /ˌreɪdɪˈɒnɪks/ ▶ **plural noun** [treated as sing.] a system of alternative medicine based on the supposition that detectable electromagnetic radiation emitted by living matter can be interpreted diagnostically and transmitted to treat illness at a distance by complex electrical instruments.
– ORIGIN 1940s: from **RADIO-** 'radiation', on the pattern of *electronics*.

radionuclide ▶ **noun** a radioactive nuclide.

radiopaque /ˌreɪdɪəʊˈpeɪk/ (also **radio-opaque**) ▶ **adjective** (of a substance) opaque to X-rays or similar radiation.
– DERIVATIVES **radiopacity** noun.

radiophonic ▶ **adjective** of, relating to, or denoting sound, especially music, produced electronically.

radioscopy /ˌreɪdɪˈɒskəpi/ ▶ **noun** [mass noun] Physics the examination by X-rays or similar radiation of objects opaque to light.
– DERIVATIVES **radioscopic** adjective.

radiosonde /ˈreɪdɪəʊˌsɒnd/ ▶ **noun** dated an instrument carried by balloon or other means to various levels of the atmosphere and transmitting measurements by radio.
– ORIGIN 1930s: from **RADIO-** (relating to broadcasting) + German *Sonde* 'probe'.

radio-telephony ▶ **noun** [mass noun] telephony using radio transmission.
– DERIVATIVES **radio-telephone** noun, **radio-telephonic** adjective.

radio telescope ▶ **noun** Astronomy an instrument used to detect radio emissions from the sky, whether from natural celestial objects or from artificial satellites.

radiotelex ▶ **noun** a telex sent by radio, typically from a ship to land.

radiotherapy ▶ **noun** [mass noun] the treatment of disease, especially cancer, using X-rays or similar forms of radiation.
– DERIVATIVES **radiotherapeutic** adjective, **radiotherapist** noun.

radio wave ▶ **noun** an electromagnetic wave of a frequency between about 10^4 and 10^{11} or 10^{12} Hz, as used for long-distance communication.

radish ▶ **noun** **1** a swollen pungent-tasting edible root, especially a variety which is small, spherical, and red, and eaten raw with salad. See also **MOOLI**. **2** the plant of the cabbage family which yields this root.
● *Raphanus sativus*, family Cruciferae.
– ORIGIN Old English *rædic*, from Latin *radix*, *radic-* 'root'.

radium /ˈreɪdɪəm/ ▶ **noun** [mass noun] the chemical element of atomic number 88, a rare radioactive metal of the alkaline earth series. It was formerly used as a source of radiation for radiotherapy. (Symbol: **Ra**)
– ORIGIN late 19th cent.: from Latin *radius* 'ray' + **-IUM**.

radium emanation ▶ **noun** archaic term for **RADON**.

radius /ˈreɪdɪəs/ ▶ **noun** (pl. **radii** /-dɪʌɪ/ or **radiuses**) **1** a straight line from the centre to the circumference of a circle or sphere.
■ a radial line from the focus to any point of a curve. ■ the length of the radius of a circle or sphere. ■ a specified distance from a centre in all directions: *there are plenty of local pubs within a two-mile radius.*
2 Anatomy the thicker and shorter of the two bones in the human forearm. Compare with **ULNA**.
■ Zoology the corresponding bone in a vertebrate's foreleg or a bird's wing. ■ Zoology (in an echinoderm or coelenterate) any of the primary axes of radial symmetry. ■ Entomology any of the main veins in an insect's wing.
▶ **verb** (**radiused**, **radiusing**) [with obj.] [often as adj. **radiused**] give a rounded form to (a corner or edge).
– ORIGIN late 16th cent. (in sense 2): from Latin, literally 'staff, spoke, ray'.

radius of curvature ▶ **noun** Mathematics the radius of a circle which touches a curve at a given point and has the same tangent and curvature at that point.

radius vector ▶ **noun** Mathematics a line of variable length drawn from a fixed origin to a curve.
■ Astronomy such a line joining a satellite or other celestial object to its primary.

radix /ˈradɪks, ˈreɪ-/ ▶ **noun** (pl. **radices** /-dɪsiːz/) **1** Mathematics the base of a system of numeration. **2** formal a source or origin of something: *Judaism is the radix of Christianity.*
– ORIGIN early 17th cent. (in sense 2): from Latin, literally 'root'. Sense 1 dates from the late 18th cent.

Radnorshire /ˈradnəʃɪə, -ʃə/ a former county of eastern Wales. It became part of Powys in 1974.

Radom /ˈrɑːdɒm/ an industrial city in central Poland; pop. 228,490 (1990).

radome /ˈreɪdəʊm/ ▶ **noun** a dome or other structure protecting radar equipment and made from material transparent to radio waves, especially one on the outer surface of an aircraft.
– ORIGIN 1940s: blend of **RADAR** and **DOME**.

radon /ˈreɪdɒn/ ▶ **noun** [mass noun] the chemical element of atomic number 86, a rare radioactive gas belonging to the noble gas series. (Symbol: **Rn**)
– ORIGIN early 20th cent.: from **RADIUM**, on the pattern of *argon*.

radula /ˈradjʊlə/ ▶ **noun** (pl. **radulae** /-liː/) Zoology (in a mollusc) a rasp-like structure of tiny teeth used for scraping food particles off a surface and drawing them into the mouth.
– DERIVATIVES **radular** adjective.
– ORIGIN late 19th cent.: from Latin, literally 'scraper', from *radere* 'to scrape'.

radwaste /ˈradweɪst/ ▶ **noun** [mass noun] informal radioactive waste.

Raeburn /ˈreɪbəːn/, Sir Henry (1756–1823), Scottish portrait painter. The leading Scottish portraitist of his day, he depicted the local intelligentsia and Highland chieftains in a bold and distinctive style.

RAF ▶ **abbreviation for** (in the UK) Royal Air Force.

Rafferty's rules /ˈrafətɪz/ ▶ **plural noun** Austral./NZ informal no rules at all: *the campaign was fought according to Rafferty's rules.*
– ORIGIN 1920s: *Rafferty*, probably an English dialect alteration of **REFRACTORY**.

raffia ▶ **noun** a palm tree native to tropical Africa and Madagascar, with a short trunk and leaves which may be up to 18 m (60 feet) long.
● *Raphia ruffia*, family Palmae.
■ [mass noun] the fibre from these leaves, used for making items such as hats, baskets, and mats.
– ORIGIN early 18th cent.: from Malagasy.

raffinate /ˈrafɪneɪt/ ▶ **noun** Chemistry a liquid from which impurities have been removed by solvent extraction.
– ORIGIN 1920s: from French *raffiner* or German *raffinieren* 'refine' + **-ATE**[1].

raffinose /ˈrafɪnəʊz, -s/ ▶ **noun** [mass noun] Chemistry a sugar present in sugar beet, cotton seed, and many cereals. It is a trisaccharide containing glucose, galactose, and fructose units.
– ORIGIN late 19th cent.: from French *raffiner* 'refine' + **-OSE**[2].

raffish ▶ **adjective** unconventional and slightly disreputable, especially in an attractive manner: *his raffish air.*

Re[1] /reɪ/ variant spelling of **RA**[1].

Re[2] ▶ **symbol for** the chemical element rhenium.

re[1] /riː, reɪ/ ▶ **preposition** in the matter of (used typically as the first word in the heading of an official document or to introduce a reference in an official letter): *re: invoice 87.*
■ about; concerning: *I saw the deputy head re the incident.*
– ORIGIN Latin, ablative of *res* 'thing'.

USAGE It is often said that, strictly speaking, **re** should be used in headings and references, as in *Re: Ainsworth versus Chambers*, but not as a normal word meaning 'regarding', as in *thanks for your letter re TSB*. However, the evidence suggests that **re** is now widely used in the second context in official and semi-official contexts, and is now generally accepted. It is hard to see any compelling logical argument against using it as an ordinary English word in this way.

re[2] ▶ **noun** variant spelling of **RAY**[3].

re- ▶ **prefix** **1** once more; afresh; anew: *reaccustom* | *reactivate.*
■ with return to a previous state: *restore* | *revert.*

■ in opposition: *repel* | *resistance.*
3 behind or after: *relic* | *remain.*
■ in a withdrawn state: *recluse* | *reticent.* ■ back and away; down: *recede* | *relegation.*
4 with frequentative or intensive force: *refine* | *resound.*
5 with negative force: *recant.*
– ORIGIN from Latin *re-*, *red-* 'again, back'.

USAGE In modern English, the tendency is for words formed with prefixes such as **re-** to be unhyphenated: **restore, remain, reacquaint**. One general exception to this is when the word to which **re-** attaches begins with **e**: in this case a hyphen is often inserted for clarity: **re-examine, re-enter, re-enact**. A hyphen is sometimes also used where the word formed with the prefix would be identical to an already existing word: **re-cover** (meaning 'cover again', as in *we decided to re-cover the dining-room chairs*) not **recover** (meaning 'get better in health'). Similar guidelines apply to other prefixes such as **pre-**.

're informal ▶ **abbreviation for** are (usually after the pronouns you, we, and they): *we're a bit worried.*

– ORIGIN Middle English: from Old French *reisun* (noun), *raisoner* (verb), from a variant of Latin *ratio*(*n*-), from the verb *reri* 'consider'.

USAGE **1** The construction **the reason why** ... has been objected to on the grounds that the subordinate clause should express a statement, using a *that*-clause, not imply a question with a *why*-clause: ***the reason (that) I decided not to phone*** rather than ***the reason why I decided not to phone.***
2 An objection is also made to the construction **the reason** ... **is because**, as in ***the reason I didn't phone is because my mother has been ill.*** The objection is made on the grounds that either 'because' or 'the reason' is redundant; it is better to use the word **that** instead (***the reason I didn't phone is that*** ...) or rephrase altogether (*I didn't phone because ...*).
Nevertheless, both the above usages are well established (nearly 20 per cent of relevant citations in the Oxford Reading Programme are for the construction **the reason** ... **is because**, for example) and, though more elegant phrasing can no doubt be found, they are generally accepted in standard English.

2 Physics the dependence of various physical phenomena on relative motion of the observer and the observed objects, especially regarding the nature and behaviour of light, space, time, and gravity.

The concept of relativity was set out in Einstein's **special theory of relativity**, published in 1905. This states that all motion is relative and that the velocity of light in a vacuum has a constant value which nothing can exceed. Among its consequences are the following: the mass of a body increases and its length (in the direction of motion) shortens as its speed increases; the time interval between two events occurring in a moving body appears greater to a stationary observer; and mass and energy are equivalent and interconvertible. Einstein's **general theory of relativity**, published in 1915, extended the theory to accelerated motion and gravitation, which was treated as a curvature of the space–time continuum. It predicted that light rays would be deflected, and shifted in wavelength, when passing through a substantial gravitational field, effects which have been experimentally confirmed.

2 Grammar (of a relative clause or descriptive phrase) serving to specify the particular instance or instances being mentioned.

– DERIVATIVES **restrictively** adverb, **restrictiveness** noun.

USAGE What is the difference between *the books which were on the table once belonged to my aunt* and *the books, which were on the table, once belonged to my aunt*? In the first sentence the speaker uses the relative clause to pick out a subset of books (the ones on the table) and imply a contrast with some other set of books. In the second sentence the size of the set of books referred to is unaffected by the relative clause; the speaker merely offers the additional information that they happen to be on the table.

This distinction is between **restrictive** and **non-restrictive** relative clauses. In writing, a non-restrictive relative clause is set off within commas, while in speech the difference is expressed by a difference in intonation. Ignorance of the distinction can lead to unintentionally comic effects: for example, strictly speaking, the relative clause in *if you are in need of assistance, please ask any member of staff who will be pleased to help* implies contrast with another set of staff who will not be pleased to help. A comma is needed before **who**.

restrictive covenant ▶ **noun** Law a covenant imposing a restriction on the use of land so that the value and enjoyment of adjoining land will be preserved.

– ORIGIN French, literally 'romance of the rose'.

Roman Empire the empire established by Augustus in 27 BC and divided by Theodosius in AD 395 into the Western or Latin and Eastern or Greek Empire.

At its greatest extent Roman rule or influence extended from Armenia and Mesopotamia in the east to the Iberian peninsula in the west, and from the Rhine and Danube in the north to Egypt and provinces on the Mediterranean coast of North Africa. The empire was divided after the death of Theodosius I (AD 395) into the Western Empire and the Eastern or Byzantine Empire (centred on Constantinople). Peace was maintained largely by the substantial presence of the Roman army, and a degree of unity was achieved by an extensive network of roads, a single legal system, and a common language (Latin in the West, Greek in the East). Rome was sacked by the Visigoths under Alaric in 410, and the last emperor of the West, Romulus Augustulus, was deposed in 476. The Eastern Empire, which was stronger, lasted until 1453.

Romanov /rəʊ'mɑ:nɒf/ a dynasty that ruled in Russia from the accession of Michael Romanov (1596–1645) in 1613 until the overthrow of the last tsar, Nicholas II, in 1917.

Roman Republic the ancient Roman state from the expulsion of the Etruscan monarchs in 509 BC (see **TARQUINIUS**) until the assumption of power by Augustus (Octavian) in 27 BC.

The republic was dominated by a landed aristocracy, the patricians, who ruled through the advisory Senate and two annually elected chief magistrates or consuls; the plebeians or common people had their own representatives, the tribunes, who in time gained the power of veto over the other magistrates. During the life of the republic Rome came to dominate the rest of Italy and, following the Punic and Macedonian Wars, began to acquire extensive dominions in the Mediterranean and Asia Minor. Dissatisfaction with the Senate's control of government led to civil wars, which culminated in Julius Caesar's brief dictatorship. This established the principle of personal autocracy, and after Caesar's assassination another round of civil war ended with Octavian's assumption of authority.

Rome the capital of Italy and of the Lazio region, situated on the River Tiber about 25 km (16 miles) inland; pop. 2,791,350. Italian name **ROMA**.
■used allusively to refer to the Roman Catholic Church.

According to tradition the ancient city was founded by Romulus (after whom it is named) in 753 BC on the Palatine Hill; as it grew it spread to the other six hills of Rome (Aventine, Caelian, Capitoline, Esquiline, and Quirinal). Rome was ruled by kings until the expulsion of Tarquinius Superbus in 510 BC led to the establishment of the Roman Republic and the beginning of the Roman Empire. By the time of the empire's fall the city was overshadowed politically by Constantinople, but emerged as the seat of the papacy and as the spiritual capital of Western Christianity. In the 14th and 15th centuries Rome became a centre of the Renaissance. It remained under papal control, forming part of the Papal States, until 1871, when it was made the capital of a unified Italy.

– ORIGIN Middle English: from the Old French stem *round-*, from a variant of Latin *rotundus* 'rotund'.

USAGE are round and around (as preposition and adverbial particle) interchangeable in all contexts? In many contexts in British English they are, as in *she put her arm round him, she put her arm around him*. There is, however, a general preference for round to be used for definite, specific movement (*she turned round; a bus came round the corner*), while around tends to be used in contexts which are less definite (*she wandered around for ages; costing around £3,000*) or for abstract uses (*a rumour circulating around the cocktail bars*). In US English, the situation is different. The normal form in most contexts is around; round is generally regarded as informal or non-standard and is only standard in certain fixed expressions, as in *all year round* and *they went round and round in circles*.
