– ORIGIN mid 16th cent.: from French *subjonctif, -ive* or late Latin *subjunctivus*, from *subjungere* (see **SUBJOIN**), rendering Greek *hupotaktikos* 'subjoined'.

USAGE *... if I were you; the report recommends that he face the tribunal; it is important that they be aware of the provisions of the act.* These sentences all contain a verb in the **subjunctive mood**. The subjunctive is used to express situations which are hypothetical or not yet realized, and is typically used for what is imagined, hoped for, demanded, or expected. In English the subjunctive mood is fairly uncommon (especially in comparison with other languages such as French and Spanish), mainly because most of the functions of the subjunctive are covered by modal verbs such as **might**, **could**, and **should**. In fact, in English the subjunctive is often indistinguishable from the ordinary **indicative mood**, since its form in most contexts is identical. It is distinctive only in the third person singular, where the normal indicative **-s** ending is absent (*he face* rather than *he faces* in the example above), and in the verb 'to be' (*I were* rather than *I was* and *they be* rather than *they are* in the examples above). In modern English the subjunctive mood still exists but is regarded in many contexts as optional. Use of the subjunctive tends to convey a more formal tone but there are few people who would regard its absence as actually wrong. Today it survives mostly in fixed expressions, as in *be that as it may*; *God help you*; *perish the thought*; and *come what may.*

than ▶ **conjunction** & **preposition** **1** introducing the second element in a comparison: [as prep.] *he was much smaller than his son* | [as conjunction] *Jack doesn't know any more than I do.*
2 used in expressions introducing an exception or contrast: [as prep.] *he claims not to own anything other than his home* | [as conjunction] *they observe rather than act.*
3 [conjunction] used in expressions indicating one thing happening immediately after another: *scarcely was the work completed than it was abandoned.*
– ORIGIN Old English *than(ne)*, *thon(ne)*, *thænne*, originally the same word as **THEN**.

USAGE Traditional grammar holds that personal pronouns following **than** should be in the subjective rather than the objective case: *he is smaller than she* rather than *he is smaller than her*. This is based on an analysis of **than** by which **than** is a conjunction and the personal pronoun ('she') is standing in for a full clause: *he is smaller than she is*. However, it is arguable that **than** in this context is not a conjunction but a preposition, similar grammatically to words like **with**, **between**, or **for**. In this case the personal pronoun is objective: *he is smaller than her* is standard in just the same way as, for example, *I work with her* is standard (not *I work with she*). Whatever the grammatical analysis, the evidence confirms that sentences like *he is smaller than she* are uncommon in modern English and only ever found in formal contexts. Uses involving the objective personal pronoun, on the other hand, are almost universally accepted. For more explanation, see **usage** at **PERSONAL PRONOUN** and **BETWEEN**.

thana /'θɑːnɑː/ ▶ **noun** Indian a police station.
– ORIGIN from Hindi *thānā*, from Sanskrit *sthāna* 'place, station'.

thankful ▶ **adjective** pleased and relieved: [with clause] *they were thankful that the war was finally over* | [with infinitive] *I was very thankful to be alive.*
■ expressing gratitude and relief: *an earnest and thankful prayer.*
– DERIVATIVES **thankfulness** noun.
– ORIGIN Old English *thancful* (see **THANK**, **-FUL**).

thankfully ▶ **adverb** in a thankful manner: *she thankfully accepted the armchair she was offered.*
■ [sentence adverb] used to express pleasure or relief at the situation or outcome that one is reporting: fortunately: *thankfully, everything went smoothly.*
– ORIGIN Old English *thancfullīce* (see **THANKFUL**, **-LY**²).

USAGE **Thankfully** has been used for centuries to mean 'in a thankful manner', as in *she accepted the offer thankfully*. Since the 1960s it has also been used as a sentence adverb to mean 'fortunately', as in *thankfully, we didn't have to wait*. Although this use has not attracted the same amount of attention as **hopefully**, it has been criticized for the same reasons. It is, however, far commoner now than the traditional use, accounting for more than 80 per cent of citations for **thankfully** in the British National Corpus. For further explanation, see **usage** at **HOPEFULLY**.

thankless ▶ **adjective** (of a job or task) difficult or unpleasant and not likely to bring one pleasure or the appreciation of others.

– PHRASES **no thanks to** used to imply that someone has failed to contribute to, or has hindered, a successful outcome: *we've won, but no thanks to you.* **thanks a million** informal thank you very much. **thanks to** as a result of; due to: *it's thanks to you that he's in this mess.*
– ORIGIN Old English *thancas*, plural of *thanc* '(kindly) thought, gratitude', of Germanic origin; related to Dutch *dank* and German *Dank*, also to **THINK**.

thanksgiving ▶ **noun** [mass noun] **1** the expression of gratitude, especially to God: *he offered prayers in thanksgiving for his safe arrival* | [count noun] *he described the service as a thanksgiving.*
2 (**Thanksgiving** or **Thanksgiving Day**) (in North America) an annual national holiday marked by religious observances and a traditional meal including turkey. The holiday commemorates a harvest festival celebrated by the Pilgrim Fathers in 1621, and is held in the US on the fourth Thursday in November. A similar holiday is held in Canada, usually on the second Monday in October.

thank you ▶ **exclamation** a polite expression used when acknowledging a gift, service, or compliment, or accepting or refusing an offer: *thank you for your letter* | *no thank you, I'll give it a miss.*

– ORIGIN Old English *thæt*, nominative and accusative singular neuter of *se* 'the', of Germanic origin; related to Dutch *dat* and German *das*.

USAGE 1 The word that can be omitted in standard English where it introduces a subordinate clause, as in *she said (that) she was satisfied*. It can also be dropped in a relative clause where the subject of the subordinate clause is not the same as the subject of the main clause, as in *the book (that) I've just written* ('the book' and 'I' are two different subjects). Where the subject of the subordinate clause and the main clause are the same, use of the word that is obligatory, as in *the woman that owns the place* ('the woman' is the subject of both clauses).
2 It is sometimes argued that, in relative clauses, that should be used for non-human references, while who should be used for human references: *a house that overlooks the park* but *the woman who lives next door.*
In practice, while it is true to say that who is restricted to human references, the function of that is flexible. It has been used for human and non-human references since at least the 11th century. In standard English it is interchangeable with who in this context.
3 Is there any difference between the use of that and which in sentences such as *any book that gets children reading is worth having*, and *any book which gets children reading is worth having*? The general rule is that, in **restrictive relative clauses**, where the relative clause serves to define or restrict the reference to the particular one described, which could replace that. However, in non-restrictive relative clauses, where the relative clause serves only to give additional information, that cannot be used: *this book, which is set in the last century, is very popular with teenagers* but not *this book, that is set in the last century, is very popular with teenagers.*

Theophrastus /θɪə'frastəs/ (*c.*370–*c.*287 BC), Greek philosopher and scientist, the pupil and successor of Aristotle. The most influential of his works was *Characters*, a collection of sketches of psychological types.

theophylline /θɪə'fɪli:n, -lɪn/ ▶ **noun** [mass noun] Chemistry a bitter crystalline compound present in small quantities in tea leaves, isomeric with theobromine.
– ORIGIN late 19th cent.: from modern Latin *Thea* (former genus name of the tea plant, from Dutch *thee*) + Greek *phullon* 'leaf' + **-INE**[4].

theorbo /θɪ'ɔ:bəʊ/ ▶ **noun** (pl. **-os**) a large lute with the neck extended to carry several long bass strings, used for accompaniment in 17th and early 18th century music.
– ORIGIN early 17th cent.: from Italian *tiorba*, of unknown origin.

theorem /'θɪərəm/ ▶ **noun** Physics & Mathematics a general proposition not self-evident but proved by a chain of reasoning; a truth established by means of accepted truths.
■a rule in algebra or other branches of mathematics expressed by symbols or formulae.
– DERIVATIVES **theorematic** /-'matɪk/ adjective.
– ORIGIN mid 16th cent.: from French *théorème*, or via late Latin from Greek *theōrēma* 'speculation, proposition', from *theōrein* 'look at', from *theōros* 'spectator'.

theoretic /θɪə'rɛtɪk/ ▶ **adjective** another term for **THEORETICAL**.
– ORIGIN early 17th cent. (in the sense 'conjectural'): via late Latin from Greek *theōrētikos*, from *theōrētos* 'that may be seen', from *theōrein* (see **THEOREM**).

theoretical ▶ **adjective** concerned with or involving the theory of a subject or area of study rather than its practical application: *a theoretical physicist* | *the training is task-related rather than theoretical.*
■based on or calculated through theory rather than experience or practice: *the theoretical value of their work.*
– DERIVATIVES **theoretically** adverb [sentence adverb] *theoretically we might expect this to be true.*

theoretician /ˌθɪərɪ'tɪʃ(ə)n/ ▶ **noun** a person who forms, develops, or studies the theoretical framework of a subject.

theorist ▶ **noun** a person concerned with the theoretical aspects of a subject; a theoretician.

theorize (also **-ise**) ▶ **verb** [no obj.] form a theory or set of theories about something: [as noun **theorizing**] *they are more interested in obtaining results than in political theorizing.*
■[with obj.] create a theoretical premise or framework for (something): *women should be doing feminism rather than theorizing it.*
– DERIVATIVES **theorization** noun, **theorizer** noun.

theory ▶ **noun** (pl. **-ies**) a supposition or a system of ideas intended to explain something, especially one based on general principles independent of the thing to be explained: *Darwin's theory of evolution.*

therewithal ▶ **adverb** archaic together with that; besides: *he was to make a voyage and his fortune therewithal*.

Theria /ˈθɪərɪə/ Zoology a major group of mammals that comprises the marsupials and placentals. Compare with **PROTOTHERIA**.
● Subclass Theria, class Mammalia.
– DERIVATIVES **therian** noun & adjective.
– ORIGIN modern Latin (plural), from Greek *thēria* 'wild animals'.

theriac /ˈθɪərɪak/ ▶ **noun** [mass noun] archaic an ointment or other medicinal compound used as an antidote to snake venom or other poison.
– ORIGIN late Middle English: from Latin *theriaca* (see **TREACLE**).

therianthropic /ˌθɪərɪanˈθrɒpɪk/ ▶ **adjective** (especially of a deity) combining the form of an animal with that of a man.
– ORIGIN late 19th cent.: from Greek *thērion* 'wild animal' + *anthrōpos* 'human being' + **-IC**.

theriomorphic /ˌθɪərɪə(ʊ)ˈmɔːfɪk/ ▶ **adjective** (especially of a deity) having an animal form.
– ORIGIN late 19th cent.: from Greek *thērion* 'wild beast' + **-MORPH** + **-IC**.

therm ▶ **noun** a unit of heat, especially as the former statutory unit of gas supplied in the UK equivalent to 100,000 British thermal units or 1.055 × 10^8 joules.
– ORIGIN 1920s: from Greek *thermē* 'heat'.

thermae /ˈθəːmiː/ ▶ **plural noun** (in ancient Greece and Rome) hot baths used for public bathing.
– ORIGIN Latin, from Greek *thermai* 'hot baths', from *thermē* 'heat'.

thermal ▶ **adjective** of or relating to heat.
■ another term for **GEOTHERMAL**. ■ (of a garment) made of a fabric that provides exceptional insulation to keep the body warm: *thermal underwear*.
▶ **noun** **1** an upward current of warm air, used by gliders, balloons, and birds to gain height.
2 (usu. **thermals**) a thermal garment, especially underwear.
– DERIVATIVES **thermally** adverb.
– ORIGIN mid 18th cent. (in the sense 'relating to hot springs'): from French, from Greek *thermē* 'heat'.

thermal capacity ▶ **noun** the number of heat units needed to raise the temperature of a body by one degree.

thermal diffusivity ▶ **noun** the thermal conductivity of a substance divided by the product of its density and its specific heat capacity.

thermal efficiency ▶ **noun** the efficiency of a heat engine measured by the ratio of the work done by it to the heat supplied to it.

thermal imaging ▶ **noun** [mass noun] the technique of using the heat given off by an object to produce an image of it or locate it.

thermal inversion ▶ **noun** see **INVERSION** (sense 2).

thermalize (also **-ise**) ▶ **verb** attain or cause to attain thermal equilibrium with the environment.
– DERIVATIVES **thermalization** noun.

thermal neutron ▶ **noun** a neutron in thermal equilibrium with its surroundings.

thermal noise ▶ **noun** [mass noun] Electronics electrical fluctuations arising from the random thermal motion of electrons.

thermal paper ▶ **noun** [mass noun] heat-sensitive paper used in thermal printers.

thermal printer ▶ **noun** a printer in which fine heated pins form characters on heat-sensitive paper.

thermal reactor ▶ **noun** a nuclear reactor using thermal neutrons.

thermal shock ▶ **noun** [mass noun] a sudden temperature fluctuation causing stress in an object or substance.

thermal spring ▶ **noun** a spring of naturally hot water.

thermal unit ▶ **noun** a unit for measuring heat.

thermic ▶ **adjective** of or relating to heat.
– ORIGIN mid 19th cent.: from Greek *thermē* 'heat' + **-IC**.

thermic lance ▶ **noun** a steel pipe packed with steel wool through which a jet of oxygen or other gas may be passed to generate a very hot cutting flame by the burning of the pipe.

Thermidor /ˈθəːmɪdɔː, French tɛʀmidɔʀ/ ▶ **noun** the eleventh month of the French Republican calendar (1793–1805), originally running from 19 July to 17 August.
– DERIVATIVES **Thermidorian** adjective.
– ORIGIN French, from Greek *thermē* 'heat' + *dōron* 'gift'.

thermion /ˈθəːmɪɒn/ ▶ **noun** an ion or electron emitted by a substance at high temperature.
– ORIGIN early 20th cent.: from **THERMO-** 'of heat' + **ION**.

thermionic ▶ **adjective** of or relating to electrons emitted from a substance at very high temperature.

thermionic emission ▶ **noun** the emission of electrons from a heated source.

thermionics ▶ **plural noun** [treated as sing.] the branch of science and technology concerned with thermionic emission.

thermionic valve (US **thermionic tube**) ▶ **noun** Electronics a device giving a flow of thermionic electrons in one direction, used especially in the rectification of a current and in radio reception.

thermistor /θəːˈmɪstə/ ▶ **noun** an electrical resistor whose resistance is greatly reduced by heating, used for measurement and control.
– ORIGIN 1940s: contraction of *thermal resistor*.

thermite /ˈθəːmʌɪt/ (also **thermit** /-mɪt/) ▶ **noun** [mass noun] a mixture of finely powdered aluminium and iron oxide that produces a very high temperature on combustion, used in welding and for incendiary bombs.

– ORIGIN early 20th cent.: coined in German from **THERMO-** 'of heat' + **-ITE**[1].

thermo- ▶ **combining form** relating to heat: *thermodynamics* | *thermoelectric*.
– ORIGIN from Greek *thermos* 'hot', *thermē* 'heat'.

thermochemistry ▶ **noun** [mass noun] the branch of chemistry concerned with the quantities of heat evolved or absorbed during chemical reactions.
– DERIVATIVES **thermochemical** adjective.

thermochromic /ˌθəːməˈkrəʊmɪk/ ▶ **adjective** (of a substance) undergoing a reversible change of colour when heated or cooled.

thermocline /ˈθəːmə(ʊ)klʌɪn/ ▶ **noun** an abrupt temperature gradient in a body of water such as a lake, marked by a layer above and below which the water is at different temperatures.

thermocouple ▶ **noun** a thermoelectric device for measuring temperature, consisting of two wires of different metals connected at two points, a voltage being developed between the two junctions in proportion to the temperature difference.

thermodynamics ▶ **plural noun** [treated as sing.] the branch of physical science that deals with the relations between heat and other forms of energy (such as mechanical, electrical, or chemical energy), and, by extension, of the relationships and interconvertibility of all forms of energy.

> The **first law of thermodynamics** states the equivalence of heat and work and reaffirms the principle of conservation of energy. The **second law** states that heat does not of itself pass from a cooler to a hotter body. Another, equivalent, formulation of the second law is that the entropy of a closed system can only increase. The **third law** (also called Nernst's heat theorem) states that it is impossible to reduce the temperature of a system to absolute zero in a finite number of operations.

– DERIVATIVES **thermodynamic** adjective, **thermodynamical** adjective, **thermodynamically** adverb, **thermodynamicist** noun.

thermo-elastic ▶ **adjective** of or relating to elasticity in connection with heat.

thermoelectric ▶ **adjective** producing electricity by a difference of temperatures.
– DERIVATIVES **thermoelectrically** adverb, **thermoelectricity** noun.

thermoforming ▶ **noun** the process of heating a thermoplastic material and shaping it in a mould.

thermogenesis /ˌθəːmə(ʊ)ˈdʒɛnɪsɪs/ ▶ **noun** [mass noun] the production of heat, especially in a human or animal body.
– DERIVATIVES **thermogenic** adjective.

thermogram ▶ **noun** a record made by a thermograph.

thermograph ▶ **noun** an instrument that produces a trace or image representing a record of the varying temperature or infrared radiation over an area or during a period of time.

thermography ▶ **noun** [mass noun] **1** the use of thermograms to study heat distribution in structures or regions, for example in detecting tumours.
2 a printing technique in which a wet ink image is fused by heat or infrared radiation with a resinous powder to produce a raised impression.
– DERIVATIVES **thermographic** adjective.

thermohaline circulation /ˌθəːmə(ʊ)ˈhaɪlʌɪn, -ˈhaɪliːn/ ▶ **noun** [mass noun] Oceanography the movement of seawater in a pattern of flow dependent on variations in temperature, which give rise to changes in salt content and hence in density.

thermokarst /ˈθəːmə(ʊ)kɑːst/ ▶ **noun** [mass noun] Geology a form of periglacial topography resembling karst, with hollows produced by the selective melting of permafrost.

thermolabile /ˌθəːmə(ʊ)ˈleɪbʌɪl, -bɪl/ ▶ **adjective** chiefly Biochemistry (of a substance) readily destroyed or deactivated by heat.

thermoluminescence ▶ **noun** [mass noun] the property of some materials which have accumulated energy over a long period of becoming luminescent when pretreated and subjected to high temperatures, used as a means of dating ancient ceramics and other artefacts.
– DERIVATIVES **thermoluminescent** adjective.

thermolysis /θəˈmɒlɪsɪs/ ▶ **noun** [mass noun] Chemistry the breakdown of molecules by the action of heat.
– DERIVATIVES **thermolytic** adjective.

thermometer ▶ **noun** an instrument for measuring and indicating temperature, typically one consisting of a narrow, hermetically sealed glass tube marked with graduations and having at one end a bulb containing mercury or alcohol which extends along the tube as it expands.
– DERIVATIVES **thermometric** adjective, **thermometrical** adjective, **thermometry** noun.
– ORIGIN mid 17th cent.: from French *thermomètre* or modern Latin *thermometrum*, from **THERMO-** 'of heat' + *-metrum* 'measure'.

thermonuclear ▶ **adjective** relating to or using nuclear reactions that occur only at very high temperatures.
■of, relating to, or involving weapons in which explosive force is produced by thermonuclear reactions.

thermophile /ˈθəːmə(ʊ)fʌɪl/ ▶ **noun** Microbiology a bacterium or other micro-organism that grows best at higher than normal temperatures.
– DERIVATIVES **thermophilic** adjective.

thermopile /ˈθəːmə(ʊ)pʌɪl/ ▶ **noun** a set of thermocouples arranged for measuring small quantities of radiant heat.

thermoplastic Chemistry ▶ **adjective** denoting substances (especially synthetic resins) that become plastic on heating and harden on cooling, and are able to repeat these processes. Often contrasted with **THERMOSETTING**.
▶ **noun** (usu. **thermoplastics**) a substance of this kind.

Thermopylae /θəˈmɒpɪliː/ a pass between the mountains and the sea in Greece, about 200 km (120 miles) north-west of Athens, originally narrow but now much widened by the recession of the sea. In 480 BC it was the scene of the defence against the Persian army of Xerxes I by 6,000 Greeks; among them were 300 Spartans, all of whom, including their king Leonidas, were killed.

thermoregulate ▶ **verb** [no obj.] regulate temperature, especially one's own body temperature.
– DERIVATIVES **thermoregulation** noun, **thermoregulatory** adjective.

Thermos (also **Thermos flask**, US also **Thermos bottle**) ▶ **noun** trademark a vacuum flask.
– ORIGIN early 20th cent.: from Greek, literally 'hot'.

thermosetting ▶ **adjective** Chemistry denoting substances (especially synthetic resins) which set permanently when heated. Often contrasted with **THERMOPLASTIC**.
– DERIVATIVES **thermoset** adjective & noun.

thermosphere ▶ **noun** the region of the atmosphere above the mesosphere and below the height at which the atmosphere ceases to have the properties of a continuous medium. The thermosphere is characterized throughout by an increase in temperature with height.

thermostable ▶ **adjective** chiefly Biochemistry (of a substance) not readily destroyed or deactivated by heat.

thermostat /ˈθəːməstat/ ▶ **noun** a device that automatically regulates temperature, or that activates a device when the temperature reaches a certain point.
– DERIVATIVES **thermostatic** adjective, **thermostatically** adverb.

thermotropism /ˌθəːmə(ʊ)ˈtrəʊpɪz(ə)m/ ▶ **noun** [mass noun] Biology the turning or bending of a plant or other organism in response to a directional source of heat.
– DERIVATIVES **thermotropic** adjective.

theropod /ˈθɪərə(ʊ)pɒd/ ▶ **noun** a carnivorous dinosaur of a group whose members are typically bipedal and range from small and delicately built to very large.
● Suborder Theropoda, order Saurischia; includes the carnosaurs, ornithomimosaurs, ceolurosaurs, and dromaeosaurids.
– ORIGIN 1930s: from Greek *thēr* 'beast' + *pous*, *pod-* 'foot'.

thesaurus /θɪˈsɔːrəs/ ▶ **noun** (pl. **thesauri** /-rʌɪ/ or **thesauruses**) a book that lists words in groups of synonyms and related concepts.
■archaic a dictionary or encyclopedia.
– ORIGIN late 16th cent.: via Latin from Greek *thēsauros* 'storehouse, treasure'. The original sense 'dictionary or encyclopedia' was narrowed to the current meaning by the publication of Roget's *Thesaurus of English Words and Phrases* (1852).

these plural form of **THIS**.

Theseus /ˈθiːsɪəs/ Greek Mythology The legendary hero of Athens, son of Poseidon (or, in another account, of Aegeus, king of Athens) and husband of Phaedra. He slew the Cretan Minotaur with the help of Ariadne.

Thesiger /ˈθɛsɪdʒə/, Wilfred (Patrick) (b.1910), English explorer. He explored many countries, notably Saudi Arabia and Oman. Notable works: *Arabian Sands* (1959) and *The Marsh Arabs* (1964).

thesis /ˈθiːsɪs/ ▶ **noun** (pl. **theses** /-siːz/) **1** a statement or theory that is put forward as a premise to be maintained or proved: *his central thesis is that psychological life is not part of the material world.*
■(in Hegelian philosophy) a proposition forming the first stage in the process of dialectical reasoning. Compare with **ANTITHESIS**, **SYNTHESIS**.
2 a long essay or dissertation involving personal research, written by a candidate for a university degree: *a doctoral thesis.*
3 /ˈθiːsɪs, ˈθɛsɪs/ Prosody an unstressed syllable or part of a metrical foot in Greek or Latin verse. Often contrasted with **ARSIS**.
– ORIGIN late Middle English (in sense 3): via late Latin from Greek, literally 'placing, a proposition', from the root of *tithenai* 'to place'.

thesp informal ▶ **abbreviation for** thespian.

thespian /ˈθɛspɪən/ formal or humorous ▶ **adjective** of or relating to drama and the theatre: *thespian talents.*
▶ **noun** an actor or actress.
– ORIGIN late 17th cent.: from the name **THESPIS** + **-IAN**.

Thespis /ˈθɛspɪs/ (6th century BC), Greek dramatic poet, regarded as the founder of Greek tragedy.

Thess. ▶ **abbreviation for** Epistle to the Thessalonians (in biblical references).

Thessalonians, Epistle to the /ˌθɛsəˈləʊnɪənz/ either of two books of the New Testament, letters of St Paul, to the new Church at Thessalonica.

Thessaloníki /ˌθɛsələˈniːki/ a seaport in NE Greece, the second largest city in Greece and capital of the Greek region of Macedonia; pop. 378,000 (1991). Also called **SALONICA**; Latin name **THESSALONICA** /ˌθɛsəˈlɒnɪkə, -ləˈnʌɪkə/.

Thessaly /ˈθɛsəli/ a region of NE Greece. Greek name **THESSALÍA** /ˌθɛsaˈlia/.

2 [singular] used to refer to a person of unspecified sex: *ask a friend if they could help.*

– ORIGIN Middle English: from Old Norse *their*, nominative plural masculine of *sá*; related to **THEM** and **THEIR**, also to **THAT** and **THE**.

USAGE The word **they** (with its counterparts **them**, **their**, and **themselves**) as a singular pronoun to refer to a person of unspecified sex has been used since at least the 16th century. In the late 20th century, as the traditional use of **he** to refer to a person of either sex came under scrutiny on the grounds of sexism, this use of **they** has become more common. It is now generally accepted in contexts where it follows an indefinite pronoun such as **anyone**, **no one**, **someone**, or a **person**, as in *anyone can join if they are a resident* and *each to their own*. In other contexts, coming after singular nouns, the use of **they** is now common, though less widely accepted, especially in formal contexts. Sentences such as *ask a friend if they could help* are still criticized for being ungrammatical. Nevertheless, in view of the growing acceptance of **they** and its obvious practical advantages, **they** is used in this dictionary in many cases where **he** would have been used formerly. See also **usage** at **HE** and **SHE**.

thou[1] ▶ **pronoun** [second person singular] archaic or dialect form of **YOU**, as the singular subject of a verb: *thou art fair, o my beloved.* Compare with **THEE**.

– ORIGIN Old English *thu*, of Germanic origin; related to German *du*, from an Indo-European root shared by Latin *tu*.

USAGE In modern English, the personal pronoun **you** (together with the possessives **your** and **yours**) covers a number of uses: it is both singular and plural, both objective and subjective, and both formal and familiar. This has not always been the case. In Old English and Middle English some of these different functions of **you** were supplied by different words. Thus, **thou** was at one time the singular subjective case (*thou art a beast*), while **thee** was the singular objective case (*he cares not for thee*). In addition, the form **thy** (modern equivalent **your**) was the singular possessive determiner and **thine** (modern equivalent **yours**) the singular possessive pronoun, both corresponding to **thee**. The forms **you** and **ye**, on the other hand, were at one time reserved for plural uses. By the 19th century these forms were universal in standard English for both singular and plural, polite and familiar. In present day use, **thou**, **thee**, **thy**, and **thine** survive in some traditional dialects but otherwise are found only in archaic contexts.

till[1] ▶ **preposition** & **conjunction** less formal way of saying **UNTIL**.
– ORIGIN Old English *til*, of Germanic origin; related to Old Norse *til* 'to', also ultimately to **TILL**[3].

USAGE In most contexts, **till** and **until** have the same meaning and are interchangeable. The main difference is that **till** is generally considered to be more informal than **until**. **Until** occurs more frequently than **till** in writing—around ten times as often in the British National Corpus. In addition, **until** tends to be the natural choice at the beginning of a sentence: *until very recently, there was still a chance of rescuing the situation.* Interestingly, while it is commonly assumed that **till** is an abbreviated form of **until** (the spellings 'till and 'til reflect this), **till** is in fact the earlier form. **Until** appears to have been formed by the addition of Old Norse *und* 'as far as' several hundred years after the date of the first records for **till**.

– ORIGIN late Middle English (in the sense 'emit as vapour through the surface'): from French *transpirer* or medieval Latin *transpirare*, from Latin *trans-* 'through' + *spirare* 'breathe'. Sense 1 (mid 18th cent.) is a figurative use comparable with 'leak out'.

USAGE The standard general sense of **transpire** is 'come to be known' (as in *it transpired that Mark had been baptized a Catholic*). From this, a looser sense has developed, meaning 'happen or occur' (*I'm going to find out exactly what transpired*). This looser sense, first recorded in US English towards the end of the 18th century and listed in US dictionaries from the 19th century, is criticized for being jargon, an unnecessarily long word used where **occur** and **happen** would do just as well. In practice the two senses are indistinguishable in many contexts. The newer sense is common, though, and accounts for around 25 per cent of citations for **transpire** on the Oxford Reading Programme.
