前　言

随着我国改革开放的不断向前推进，旅游事业也越来越兴旺地发展起来。尤其是近些年来，来自世界各地的客人涌向中国，试图揭开这块辽阔土地的神秘面纱，从而了解中国悠久的历史，以满足其难以诠释的好奇和幻想。

具有悠久而又丰富历史的中国，一直为自己无数的历史遗迹和文化遗产感到自豪。几乎在中国的每一个地方，人们都能欣赏到各种神奇的景观，以及世代相传的故事和神话。

在中国人民的辛勤努力下，中国在各个方面都发生了翻天覆地的变化。从经济、文化、教育，到生活、娱乐和休闲，人们都在尽情地享受着国泰民安、和谐安睦的生活。国家的建设和发展日新月异，人们的思想、观点、生活方式也有了很大的变化。

在这种形势下，我们觉得有必要给来中国工作和旅游的外国友人——尤其是给那些来参加2008年北京奥运会的各国朋友提供一些帮助，把他们可能感兴趣的事情、人物和地方简单地作一些介绍，让他们对中国有个大致的了解。由此，我们编写了《用英语说中国》这套丛书。丛书共有10部，分别是：

1.《用英语说中国——历史》
2.《用英语说中国——民俗》
3.《用英语说中国——艺术》
4.《用英语说中国——文化》
5.《用英语说中国——名城》
6.《用英语说中国——名人》
7.《用英语说中国——旅游》
8.《用英语说中国——媒体》
9.《用英语说中国——体育》
10.《用英语说中国——名校》

《用英语说中国——名校》一书中所选的64所大学都是中国“211工程”院校。“211工程”是中国政府面向21世纪，重点建设100所左右的高等院校和重点学科的建设工程。通过本书的阅读，读者可以得到对中国著名高校的全面了解。

教育资源　www.222b.com　公众号：铅笔钥匙

参编这套丛书的作者都是来自高等院校的英语教授、副教授和硕士研究生，大家都为能参与此项有意义的工作而感到兴奋和激动，都乐意为宣传中国和振兴中华贡献自己的一份力量。

《用英语说中国》这套丛书从策划到构思，从设计到编写，都是站在较高的角度，本着较新的水准，力求创造性地把中国的上上下下、东西南北、方方面面以简洁流畅的语言加以娓娓叙述。这无疑将给广大读者一种全新的感受。

《用英语说中国》这套丛书对于英语爱好者提高英语水平、激发学习英语兴趣会有所帮助的。丛书信息量庞大，涉及面广泛，古往今来，东南西北，犹如一部关于中国的小百科全书。丛书中的英文叙述和中文译述都严格遵循语言简练、结构明晰、形式活泼的宗旨。我们衷心希望这套丛书能够受到广大读者的喜爱和信赖。把中国介绍给世界，让世界上更多的人了解中国，是每个中国人的愿望。

限于编著者的水平和第一手资料的缺乏，丛书中有些地方的内容和信息可能存在着一些出入和欠缺，恳请广大读者予以批评指正。

Preface

With the rapid development of China's reform and opening-up, tourism is on the rise, esp. in recent years. More and more people from all over the world come to China, hoping to unveil the mystery of the vast land, to discover the origins of the long history in China and to satisfy their own curiosities and fantasies as well.

China, with a long and rich history, is always proud of her countless historical sites and cultural relics. Almost everywhere people encounter amazing miracles or natural beauties together with their everlasting legends and myths.

Furthermore, with the strenuous work of the whole nation, China has witnessed fundamental changes in every field. From national economy, culture and education to people's living standard, recreation and entertainments, everywhere and every soul is enjoying a peaceful and comfortable life in a friendly and harmonious atmosphere. The nation's construction and development are changing with each passing day while people's views and points are also keeping pace with the times.

Under such circumstances, we feel obliged to offer some help to those foreign visitors, esp. those who are coming to the 2008 Beijing Olympic Games, by giving them a brief introduction of the things, the people and the places they might be interested in. The series "***Talk About China in English***", therefore, come into being. The series consist of 10 books in all. They are:

1. **Talk About China in English—History**
2. **Talk About China in English—Folklore**
3. **Talk About China in English—Arts**
4. **Talk About China in English—Culture**
5. **Talk About China in English—Famous Cities**
6. **Talk About China in English—Celebrities**
7. **Talk About China in English—Tourism**
8. **Talk About China in English—Media**
9. **Talk About China in English—Sports**
10. **Talk About China in English—Famous Colleges and Universities**

In ***Talk About China in English—Famous Colleges and Universities***, 64 universities are included and they are all institutions of higher education listed in "211 Project" of China. "211 Project" is a project endorsed by China's State Council to provide preferential support for about 100 key higher education institutions and disciplines to be

built into world-class universities in the 21st century. Through reading this book, readers will get a general knowledge of China's renowned colleges and universities.

All the writers of the series are professors, associate professors and graduate-students of English from colleges and universities. We all feel happy and proud to have the chance to do our bit for the publicity of our motherland as well as her promotion.

From making plans to hatching plots, from working out schemes to carrying out the writings, the authors have been diligent and conscientious. Through our work, we want to provide readers with a rich and colorful introduction of an encyclopedic manner. The series are new and creative, and sure enough, they will bring fresh feelings and experiences to all readers.

The series are also helpful for all English lovers, including secondary school students and teachers, college students, office clerks and public servants.

Both the English and Chinese versions in the series are written in simple language, clear structure and lively style. We hope they will find popularity upon publication.

We are extremely grateful to the authors and publishers of all the materials we have chosen here in the series. We apologize for the insufficient information in some cases due to lack of resources. We intend to show every respect for intellectual property rights, but we hope our pleading of the permission to use these materials for the purpose of letting more foreign friends know China better will receive kind and generous consideration.

清华大学
Tsinghua University

General Information

Tsinghua University is one of the most famous universities in China. Located in the northwestern suburbs of Beijing—the capital city of China, Tsinghua University was built on the site of "Tsinghua Yuan", a former royal garden of Qing Dynasty, with an area of 386.34 hectares. Tsinghua University is also one of the state "Project 211" universities. Tsinghua University is a national key comprehensive research-orientated university with science, engineering, literature, liberal arts, history, philosophy, economics, administration, law, education and medicine.

Tsinghua University was established in 1911 originally as "Tsinghua Xuetang," a preparatory school for students who would be sent by the government to study in universities in the United States. The school was renamed "Tsinghua School" in

1912. The university section was instituted in 1925 and undergraduate students were then enrolled. The name "National Tsinghua University" was adopted in 1928, and in 1929 the Research Institute was set up.

The university currently has over 7 100 faculty and staff, with 34 academicians of the Chinese Academy of Sciences and 31 academicians of the Chinese Academy of Engineering, 77 special professors of "Cheungkong Scholars Program", 5 teaching masters, 94 outstanding youth receiving national scientific fund, over 900 full professors and 1 200 associate professors (including 938 doctoral supervisors). Tsinghua University has a total enrolment of 26 934 students of all kinds, including 13 709 undergraduates, 6 467 master candidates, 4 997 doctoral candidates and 1 761 foreign students. The university comprises 13 colleges with 54 departments, over 130 institutes (research centers), 11 state key labs and 4 state engineering research centers. It has 60 specialties for undergraduates, 1 specialty for the second Bachelor's degree, 26 doctorate or master programs in first-level disciplines, 1 single master program in first-level discipline, 17 doctorate or master programs in second-level disciplines, 38 single master program in second-level discipline, 170 specialties for master candidates and 128 specialties for doctoral candidates, 49 state key disciplines and 30 post-doctor research stations.

Tsinghua University Library consists of 4 professional libraries, namely library of humanities, library of economy and administration, library of architecture, library of art. It has a collection of more than 4 million books.

To fully implement the "China Education Reform and Development Program", Tsinghua University has set new development targets for the next 15 years. Educational quality and effectiveness will be improved and disciplinary structure will be adjusted. Based on our strength in engineering, the university will promote the development of science and management departments. Humanities and social sciences will stress particular areas with high academic standards.

In less than 100 years, Tsinghua University has witnessed and shared the hardships and glories of the nation. The university's motto of "Self-discipline and Social Commitment" has inspired many generations of Tsinghua teachers and students to struggle for the prosperity of China. Now, striving to build Tsinghua University into a world-class university by its 100th anniversary in 2011 has become the objective of each member of the teaching staff and the student body.

Glorious History

In 1911, Establishment of "Tsinghua Xue Tang", later changed to "Tsinghua

School" (preparatory school for students to study in the USA).

In 1925, the university section was instituted and undergraduate students were then enrolled.

In 1928, the name "National Tsinghua University" was adopted with 16 departments in four schools: Liberal Arts, Law, Sciences, and Engineering.

In 1937, Tsinghua University moved to Changsha City and merged with Peking University and Nankai University to form "Changsha Temporary University".

In 1938, National Temporary University of Changsha moved to Kunming and was renamed the National Southwestern Associated University.

In 1946, it returned to original campus - "Qing Hua Yuan" in Beijing, with 26 departments in five schools: Liberal Arts, Law, Sciences" Engineering, and Agriculture and 26 departments.

In 1952, a nationwide restructuring of institutes of higher education was initiated, and Tsinghua University became a multidisciplinary polytechnic university.

In 1984, the graduate school was formed and it was the first one in universities of the country.

In 1999, Tsinghua established the School of Arts and Design by merging with the Central Academy of Arts and Design.

In 2003, Huaxin Hospital and Yuquan Hospital which had belonged to the Ministry of Information and Industry merged to form the first accessorial hospital and the second accessorial hospital of the university.

北京大学
Peking University

General Information

Peking University is a national key comprehensive teaching and research orientated university emphasizing the liberal arts and science, and is also one of the first group of universities admitted to "Project 211". Peking University, the former Jing Shi Da Xue Tang (the Metropolitan University) of the Qing Dynasty, opened in December 1898. The Metropolitan University was then not only the most prestigious institution of higher learning but also the highest administrative organization of education in China. In May 1912, the Metropolitan University was renamed "Peking University". Mr. Yan Fu, an outstanding educationist and initiatory philosopher, was chosen as the first president. In December 1916, its presidency was taken up by Mr. Cai Yuanpei, an outstanding scientist, educationist and

democratic revolutionary, who played an active role in the reform and development of the university.

Peking University is situated at the northeast of the Haidian District at the western suburbs of Beijing with an area of 2 661 581 m^2. The campus is known as "Yan Yuan"—the gardens of Yan. It stands near the Yuan Ming Gardens and the Summer Palace.

Peking University has a glorious revolutionary tradition. In 1919, the anti-imperialist and anti-feudal May 4th Movement was initiated from the university, which had been the centre of the Chinese New-Culture Movement and the earliest base for the dissemination of Marxism in China. Chen Duxiu, Li Dazhao and Mao Zedong, founders of the Chinese communist Party, as well as Lu Xun, a great writer, thinker and chief leader of the Chinese New-Culture Movement, all either taught or held offices in the university. In order to carry on the revolutionary tradition of the May 4th Movement, the university decided, after the new China was founded, that the 4th of May be set as the date on which to celebrate the anniversary of the founding of the university.

Peking University has 4 574 faculty and staff, including 49 academicians of the Chinese Academy of Sciences (CAS) and 8 academicians of the Chinese Academy of Engineering(CAE), 9 academicians of the Third World Academy of Sciences, 14 chief scientists of "Project 973", 57 special professors of "Cheungkong Scholars Program" and 2 691 full or associate professors (including 1287 doctoral supervisors). Peking University has a total enrolment of 29 617 students of all kinds, including 14 240 undergraduates, 8 498 master candidates, 4 234 doctoral candidates and 1 776 foreign students. The university comprises 5 councils, 45 colleges and departments, 271 institutes (research centers), 16 state key labs, 18 affiliated and teaching hospitals. It has 102 specialties for undergraduates, 4 specialties for the second Bachelor's degree, 221 specialties for Master candidates and 199 specialties for Doctoral candidates, 81 state key disciplines and 35 post-doctor stations. Peking University ranks first in the number of the academicians of CAS, chief scientists, professors, doctorate tutors and Chang Jiang scholars as well as the number of state key disciplines and labs.

Peking University Library is the largest university library in Asia and has a collection of 7.03 million volumes.

Peking University has made an effective combination of the research on important scientific issues with the training of personnel with high level specialized knowl-

edge and professional skill as demanded by the country's socialist modernization. The university has become a center for teaching and research and a comprehensive university of the new type, consisting of diverse branches of learning such as pure and applied sciences, social sciences, the humanities, medical sciences and sciences of management and education.

"Member of Peking University" is a glorious name which represents not only excellence and brilliance but also diligence and duty. The tradition of Peking University has infiltrates the blood of every member of Peking University, urging on him to strive his best and devote himself to Peking University today and China in the future.

Glorious History

Peking University, the former Jing Shi Da Xue Tang (the Metropolitan University), was founded in December 1898. In May 1912, the Metropolitan University was renamed "Peking University". In 1917, its presidency was taken up by Mr. Cai Yuanpei, an outstanding scientist, educationist and democratic revolutionary, who played an active role in the reform and development of the university. By 1919, the university developed into the country's largest institution of higher learning, with 14 departments and an enrollment of more than 2 000 students.

During the War of Resistance Against Japan, Peking University moved to Kunming, a city in Yunnan Province, together with Tsinghua University and Nankai University, formed the National Southwestern Associated University. In 1946, after the victory of the war, Peking University moved back to Beiping (then the name of Beijing). At that time, the university comprised six schools (Arts, Science, Law, Medicine, Engineering and Agriculture), and a research institute for the humanities. The total enrollment of student grew to 3 000.

After the founding of the People's Republic of China, the government carried out, in 1952, a nationwide readjustment of colleges and universities with the aim to promote higher education and quicken the training of personnel with specialized

knowledge and skill by pooling the country's manpower and material resources. After the readjustment, Peking University became a university comprising departments of both liberal arts and sciences and emphasizing the teaching and research of basic sciences. By 1962, the total enrollment grew to 10 671 undergraduate students and 280 graduate students.

In April 2000, a new Peking University was founded on the basis of the merging of Peking University and Beijing University of Medical Sciences.

北京大学
Peking University

基本概况

北京大学是一所以文理教学和研究为主的综合性全国重点大学，是国家首批“211 工程”建设的高校。北京大学创办于1898 年 11 月，初名京师大学堂，是第一所国立综合性大学，当时既是中国的最高学府，也是中国最高的教育行政机关。1912 年 5 月，京师大学堂改名北京大学，著名的教育家、启蒙思想家严复出任北京大学第一任校长。1916 年 12 月，著名的科学家、教育家、民主革命家蔡元培先生出任校长，对学校的改革和发展发挥了积极的作用。

北京大学位于北京西郊海淀区的东北部，占地 2 661 581 平方米。北京大学校园又称燕园，与圆明园、颐和园相毗邻。

北京大学具有光荣的革命传统，作为新文化运动的中心和中国最早传播马克思主义和民主科学思想的发祥地，1919 年的反帝反封建主义的“五四”运动就是从北大点燃。中国共产党的创始人陈独秀、李大钊、毛泽东以及著名作家、思想家、中国新文化运动的领导人鲁迅等一批杰出人才都曾在北京大学任职或任教。新中国成立后，为了继承“五四”运动的革命传统，学校决定每年的 5 月 4 日为北京大学的

历史变迁

北京大学创于1898年12月，初名京师大学堂。1912年5月改为现名。1917年，著名教育家和民主主义革命家蔡元培出任北京大学校长，他为北京大学的改革和发展发挥了巨大的作用。至1919年，北京大学发展为国家的最大高等学府，有14个系，2 000余名在校生。

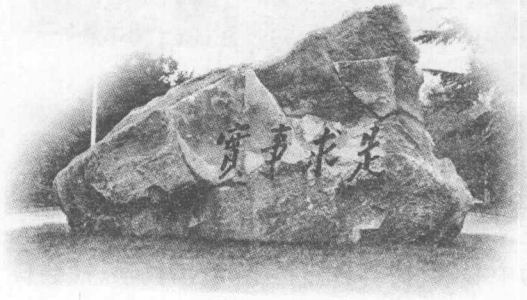

抗日战争期间，北京大学与清华大学、南开大学一起迁往昆明，改称国立西南联合大学。1946年，抗战胜利后，北京大学迁回北平（当时的北京）。当时，北京大学由6个学院（艺术、科学、法律、医药、工程、农业）和一个人文研究院组成。在校生达到3 000人。

中华人民共和国成立后，全国高校于1952年进行院系调整，以推动高等教育事业的发展，加快国家急需专门人才的培养。北京大学成为一所以文理基础教学和研究为主的综合性大学。1962年，在校本科生达到10 671人，研究生达到280人。

2000年4月北京大学和北京医科大学合并成立新的北京大学。

Renmin University of China

General Information

Renmin University of China (RUC, also known as the People's University of China) is a national key comprehensive research-orientated university emphasizing the humanities and social sciences and is also one of the first group of universities admitted to "Project 211". The RUC was formerly known as Shanbei Public School, established in 1937 during the resistance war against Japanese aggression. The University was formally established with the foundation of Huabei University on October 3, 1950, which made it the first univer-

sity to be established by the newly founded People's Republic of China.

Since its establishment, RUC students and teachers have always endeavored to carry out its redoubtable injunction to "unceasingly strive to be always in the vanguard". The RUC shares a common fate with the Party and the nation. Through prudence, dedicated effort, active and practical exploration, the RUC has become an important teaching and research base in the areas of the humanities, social sciences, and management science in China. Owing to its efforts in spreading and popularizing Marxism in China, for its achievements in developing philosophy and the social sciences in China, and on account of its indispensable contributions to the cause of socialist construction and reform, the RUC is regarded as "A Standard in the Humanities and Social Sciences in China's Higher Education Sector".

With undergraduate education as the base and an emphasis on postgraduate education, supplemented by adult education courses and online learning, the RUC has formed a multi-dimensional structure and multilevel system in education and research. The RUC has a Graduate School which is responsible for the administration of postgraduate students, and RUC now comprises 23 schools of different disciplines. The RUC also has a School of Continuing Education, a School of Education and Training, and the Shenzhen Research Institute. The quality of postgraduate research is witnessed in the sixteen doctoral degree dissertations that have been awarded outstanding prizes in nationwide evaluations of Ph. D dissertations. The RUC is now authorized to offer bachelor's degrees in sixty-one areas, and double degree in eight areas. The RUC has 144 Masters programs and 99 Ph. D. programs with 14 doctorate programs in first-level disciplines and 14 post-doctorate stations.

At present, the RUC has a large group of well-known leading scholars who are highly regarded both in China and overseas. A highly qualified and well structured teaching and research body has been formed. The RUC has a staff of 1 671 which includes 499 professors and 636 associate professors. In addition, 106 well-known intellectuals and scientists from various fields in China have contributed to the teaching and research at the RUC as honorary professors, resident professors, or part-time professors. The RUC has the top ranking in terms of the number of scholars who have gained official recognition from both the national and Beijing municipal governments. There are 388 recipients of special subsidies from the central government, 15 experts with outstanding contributions at the national level and 3 special professors of "Cheungkong Scholars Program".

The RUC has a strong faculty. Renowned scholars of past generations strove to

pave a solid foundation for the construction and development of disciplines, in education and training, and for furthering research. These scholars include Wu Yuzhang, Cheng Fangwu, Fan Wenlan, Ai Siqi, He Sijing, He Ganzhi, He Luo, Hu Hua, Shang Yue, Wu Jingchao, Li Jinghan, An Gang, Shi Jun, Miao Langshan, Li Xiulin, Xu He, Han Feng, Xu Mengxiong, Meng Yang, Tong Rou, Dai Shiguang, Liu Zheng, Zha Ruichuan, and Miao Litian.

At present, the RUC has an enrollment of 20 049 students, which breaks down into 9 947 undergraduate students, 5 921 postgraduate students for master's degree, 3025 postgraduate students for doctor's degree, and 1 156 foreign students. The ratio of postgraduates to undergraduates is the highest of all the research-orientated comprehensive universities in China. In addition, the RUC also has an enrollment of 10 000 in adult education, about 80 percent of whom are doing courses leading to a Bachelor's degree.

The RUC also functions as a resource center for data, information, and publications in the humanities and social sciences in China. The University Library has advanced facilities and has a collection of 2. 5 million books (including 400 000 thread-bound classical books) and 150 040 electronic resources. The CALIS Information Center in Social Sciences and Humanities, which was established by the Ministry of Education, is located within the University Library. The China Renda Social Sciences Information Center is an authoritative institution that collects, categorizes, stores, and publicizes publications in the humanities, social sciences, economics, and management studies. The Annual Newspaper Data Reference edited and published by the China Renda Social Sciences Information Center is one of the four major document retrieving indexes in China. The RUC Press was the first university publishing house established after the founding of the People's Republic of China, and is an important academic publishing house for university textbooks, as well as for academic and theoretical works in the humanities and social sciences.

The RUC's education standard is to cultivate and produce "outstanding exemplars for the nation and the backbone of society". Giving full play to the advantages conferred by having the largest number of branches of learning in the humanities and social sciences, and augmenting that with the RUC's overall high standard in these fields, the RUC has produced a large body of talented personnel in the theoretical, practical, and managerial worlds, in order to promote China's economic construction and social development. Since 1937, the university has turned out 200 000 high-level talented personnel in various fields who have become well

known in their fields of work, and who individually and collectively have made a great contribution to the development and progress of the country.

As an important research institution in the humanities and social sciences in China, the RUC is playing an active role in research into major issues in politics, economics, and social studies. The role the RUC has played, and the contributions the RUC has made, have provided a strong theoretical underpinning and enthusiastic intellectual support for China's economic construction and social development. Between 2000 and 2004 the RUC has received 118 provincial and ministerial level research awards, 137 competitive projects from the National Social Sciences Foundation, and 175 humanities and social science projects from the Ministry of Education. Altogether, the RUC has won a total of 2 600 projects at different levels in different fields. The total amount of these research grants has reached 240 million yuan. In terms of the number of projects and the total amount of funds, the RUC is placed first among all universities in the areas of humanities and social sciences in China.

The RUC is a platform for academic and cultural exchanges between China and the world. The RUC has established academic exchange relationships with 140 universities from 37 countries and regions in the world. The RUC has purchased the copyright to a large number of international books and has translated and published these books in order to meet the demands brought about through the reform and opening up process in China. A series of important collaborative projects have come into being at the RUC, and the RUC has hosted or organized a series of high-level international conferences on campus. Some internationally recognized scholars have been awarded the title of honorary professor by the RUC.

Mao Zedong, Liu Shaoqi and Deng Xiaoping all had great confidence in Renmin University of China, and Communist Party leaders have continued to show great concern for the construction and development of the RUC. Mr Jiang Zemin, former President of China, visited the RUC on 28 April, 2002, and made an important speech in which he expressed the hope that the RUC would, "Achieve new accomplishments in the new century, make greater contributions to the motherland, for the people, and for the construction of socialist modernization, and become one of the world's best and most renowned universities in the humanities and social sciences."

At present, staff members and students of the RUC are holding high the standard that "Development is the paramount principle", striving to emancipate the mind, to seek truth from facts, to maintain our position at the forefront of knowl-

北京理工大学
Beijing Institute of Technology

General Information

Beijing Institute of Technology (BIT) is a state key university, and an open, international and research-oriented university of science, engineering and humanities with science and engineering as the focus. It was founded in Yan'an in 1940 as Yan'an Academy of Natural Science. It is one of the first universities to run a graduate school and receive privileged fund from the central government in "the 7th, 8th and 9th Five Year Plan." BIT is also one of the state "Project 211" universities receiving preferential support from the state. In 2000, BIT was listed in "Plan 985", which gives priority for development by Commission of Science Technology and Industry for National Defense (COSTIND), Ministry of Education and Beijing Municipal Government. In 1999, BIT passed the evaluation for "Outstanding in Undergraduate Program" sponsored by Ministry of Education. BIT ranks among the first-class universities for its high educational and research quality, strong faculty teams, and academic programs with distinctive characteristics.

The main campus of BIT occupies an area of 1 369 200 square meters, with a floor space of 724 000 square meters. The construction area for Liangxiang Campus (Beijing) is 1 528 300 square meters. The construction area for Zhuhai is 3 330 000 square meters. The library has a total collection of more than 2 170 000 items.

Aiming the target of developing a first-class and world-renowned research oriented university, BIT has created favorable environment for teaching and research. There are over 3 500 faculty and staff, including 4 academicians of the Chinese Academy of Sciences (CAS) and 10 academicians of the Chinese Academy of Engineering (CAE), 1 431 full and associate professors (including researchers and senior engineers), 257 supervisors of doctorate programs, 17 experts with outstanding contributions at the national level, 5 special professors of "Cheungkong Scholars Program" and 251 recipients of special subsidies from the central government. Each year BIT undertakes over 1 000 research projects, the funding for scientific research at BIT has been increasing annually at large scale. Now BIT has 3 State Key Labs, 4 Labs for State Key Discipline, 1 open Lab of State Education Ministry, 5 Key Labs of Beijing city.

At present, the university comprises 13 schools and 41 departments and 43 institutes (research centers). As one of the first universities authorized by the State Council to grant doctorate and master degrees, BIT has 11 state key disciplines and 25 key disciplines at the ministry level. The university now has 11 doctorate programs in first-level disciplines, 23 master programs in first-level disciplines, 14 postdoctor stations, 61 doctorate program disciplines, 144 master program disciplines and 60 undergraduate majors. In 2006, BIT has a total enrolment of over 36 533, including 13 627 in 4 year undergraduate programs, 1 479 in 2 year undergraduate programs, 5 088 postgraduate students for bachelor's degree,

2 104 postgraduate students for doctor's degree, 364 overseas students and 13 871 students for online learning or adult education courses. In the past 60 years, BIT has trained 125 156 high-level talented personnel in various fields for the country.

BIT attaches great importance to the communication and cooperation domestically and internationally and has established relationship with more than 90 universities in 29 countries and districts. In order to improve the strength of the faculty, BIT appointed 174 visiting professors, 38 advisory professors and 6 honorary professors in China, plus 45 overseas visiting professors and 12 honorary professors.

With the principle of "facing modernization, facing the world, facing the future", BIT is sparing no effort to broaden its opening and deepen its reform to turn itself into a first-class world-renowned research university.

In January 1946, Yan'an Academy of Natural Science was renamed Jin-Cha-Ji Remote Area Industrial College.

In October 1948, the Engineering College of North-China University was founded on the basis of the merging of Jin-Cha-Ji Remote Area Industrial College and the Engineering College of Northern University.

In August 1949, the Engineering College of North-China University moved to Beijing.

On November 18, 1951, the Engineering College of North-China University was renamed Beijing Institute of Technology (BIT).

In 1959, BIT was designated as one of the sixteen key universities in China by the central government.

In 1988, the institution changed its Chinese name from "Institute" to "University" with the English

name remaining unchanged.

In December 1995, BIT was ratified by the central government as one of the "Project 211" universities.

1939年 北京理工大学的前身——延安自然科学院成立。

1946年1月 延安自然科学院改名为晋察冀边区工业专门学校。

1948年10月 晋察冀边区工业专门学校与北方大学工学院合并，成立华北大学工学院。

1949年8月 华北大学工学院迁入北京。

1951年11月18日 华北大学工学院改名为北京工业学院。

1959年 中央政府批准北京工业学院为全国首批16所重点院校之一。

1988年4月2日 北京工业学院更名为北京理工大学。

1995年12月 北京理工大学被批准为“211工程”大学之一。

北京航空航天大学
Beijing University of Aeronautics & Astronautics

General Information

Beijing University of Aeronautics & Astronautics (BUAA), or Beihang University (formerly Beijing Institute of Aeronautics) in 1988 for short, was founded on October 25, 1952 out of the merger of the aeronautical departments of eight famous universities such as Tsinghua University, Beiyang University. BUAA belongs to Commission of Science, Technology and Industry for National Defense, and is also one of the state “Project 211” universities and is listed in “Plan 985”, receiving preferential support from the state. Situated in the capital in the center of Zhongguancun Science Park, next to China's National Olympic Center, with an are-

a of over 100 hectares, BUAA is China' s first university of aeronautical and astronautical engineering.

Since its founding BUAA has been one of the key universities given priority for development. In the new century and millennium, BUAA was officially listed in China's Action Plan for the Revitalization of Education in the 21st Century. Over the past 50 years BUAA has provided about 80 000 professionals of high caliber in various disciplines for the country. At present, the university comprises 17 schools and 6 departments, covering such diverse fields as science, technology, liberal arts, law, economy, management, philosophy, foreign languages and education. Total faculty and staff numbers are more than 32 00, including 14 academicians of either the Chinese Academy of Science or the Chinese Academy of Engineering Sciences, over 1 200 full or associate professors, and 390 supervisors of doctorate programs. The university now has 48 undergraduate majors, 144 master programs, and 14 doctorate programs in first-level disciplines, 49 doctorate programs in second-level disciplines. BUAA has a total enrolment of over 24 000, including more than 2 700 doctorate candidates, over 6 800 master candidates, more than 14 300 in 4 or 2 year undergraduate programs, and about 370 overseas students.

It has 65 research institutes or interdisciplinary research centers, 11 key disciplines of the national level, and 89 laboratories (including 5 national key laboratories, 5 national specialized laboratories, and 15 provincial or ministerial-level key

laboratories).

The celebration of BUAA's 50 eventful years signifies an even more promising future. BUAA has evolved into an open, multi-disciplined, research-oriented university of engineering science and technology with an emphasis on aeronautical and astronautical engineering. At present the university is being developed with the joint efforts of the Commission of Science, Technology and Industry for National Defense, the Ministry of Education, the Municipal Government of Beijing, and the Chinese Academy of Engineering Sciences. Conscious of its role in invigorating China through science and education and pursuing its traditional style of "hard work, simple living, diligent learning, all-round development and courageous innovation", BUAA is deepening the reform in education and striving to realize its goal of becoming a "top-rate university in China, well-known throughout the world".

Glorious History

The meeting announcing the founding of the Beijing Institute of Aeronautics (BIA) was held in the auditorium of Beijing Institute of Technology (formerly Zhongfa University) on October 25, 1952. Faculty and students from the aeronautical departments in eight universities joined to lay the foundations for the new institute, whose chosen site was in Beiyanzhuang Village, Haidian District, in the western suburb of Beijing. Construction started on June 1 and over 60 000 m^2 square meters of building space were completed within 6 months. By October some of the faculty and students were able to start normal work and study. In the beginning there were only two departments with 4 majors: aeroplane design and aeroplane technology in the department of aeorplane engineering, and engine design, engine technology in the department of aeroplane engine engineering. In May 1988 the Institute changed to its present name of Beihang University.

BUAA was a one among the nation's first 16 key universities back in the 1950's, and a one among the top 15 for priority development during China's 7th five-year-plan period (1986 ~ 1990). During the 8th five-year-plan it was listed among the top 14 for priority development, and at the start of the 9th five-year-plan

教育资源 www.222b.com 公众号：铅笔钥匙

BUAA was a one among the first batch of 15 universities in "project 211 for Higher Education". As it entered the new century and the university was again listed in China' s Action Plan for the Revitalization of Education in the 21st Century.

Thanks to the tireless efforts of several generations of people BUAA has grown into an open, multi-disciplined, research-oriented university of engineering science and technology with an emphasis on aeronautical and astronautical engineering. Today, BUAA, as a center of both higher education and scientific research, has become one of the important bases for quality personnel education and scientific research in China.

基本概况

北京航空航天大学(简称"北航",原名北京航空学院,1988 年更名)创办于 1952 年 10 月 25 日,由当时清华大学、北洋大学等 8 所著名大学的航空院系合并而成。学校现隶属于国防科学技术工业委员会,是国家"211 工程"、"985 工程"建设的重点高校,地处北京中关村高科技核心区,占地 100 公顷,毗邻国家奥林匹克体育中心,是新中国第一所重点航空高等院校。

自建立之日起,北航就被确定为优先发展的重点大学之一。世纪之交,北航被教育部纳入国家"面向 21 世纪教育振兴行动计划"。在过去的 50 年里,北航为国家培养了近 8 万名不同学科的高级人才。目前,学校共有 17 个专业学院和 6 个系,涵盖理、工、文、法、经济、管理、哲学、外语及教育等八个门类,教职工 3 200 余人,其中"两院"院士 14 名,正、副教授 1 200 余名,博士生导师 390 余名;现有本科专业 48 个,硕士学位授权点 144 个,一级学科博士学位授权点 14 个,二级学科博士学位授权点 49 个。全日制在校生近 2.4 万人,其中,博士研究生 2 700 多名,硕士研究生 6 800 余名,普通本专科生 14 300 余人,外国留学生 370 余名。

北航拥有研究所、研究中心等各类研究机构 65 个,11 个国家重点学科,89 个实验室(包括 5 个国家级重点实验室、5 个国家专业实验室、15 个省部级重点实验室)。

经过 50 多年发展,北航已建设成为一所具有航空航天特色和工程技术优势的

多科性、开放式、研究型理工科大学。目前，国防科工委、教育部、北京市人民政府和中国工程院签署共建协议，联手共助北航发展腾飞。传承北航精神，永葆名校风采。为实现学校“十一五”规划制定的奋斗目标，面对新的机遇和挑战，北航坚持以学科建设为龙头，以人才培养为中心，以师资队伍建设为重点，努力建成国内一流、国际知名的高水平研究型大学。

历史变迁

1952 年 10 月 25 日，在北京工业学院礼堂举行的大会上宣布了北京航空学院的成立，来自于 8 所不同大学的航空系的教职员工和学生们共同建设新的学院，校址选定在北京西北郊海淀区柏颜庄。6 月 1 日破土动工，半年之内就完成了 6 万平方米的建筑。同年 10 月全体学生及部分教职工即迁居新校，开始正常的学习与工作。学院最初只有飞机、发动机两个系，开设飞机设计、飞机工艺、发动机设计、发动机工艺等四个专业。1988 年 5 月，学院更名给现在的北京航空航天大学。

北航早在 20 世纪 50 年代就被列为国家首批 16 所重点大学之一，被列为“七五”期间全国 15 所重点建设高校之一、“八五”期间全国 14 所重点建设的高校之一。“九五”期间北航被列为“211 工程”国家第一批 15 所院校之一，并且是 21 世纪振兴教育中国行动计划的院校之一。

经过几代人的不懈努力，北航已建设成为一所具有航空航天特色和工程技术优势的开放式、多科性、研究型大学。作为高等教育中心和科研中心，北京航空航天大学已经成为中国高素质人才培养基地和科研机构。

establish state-approved graduate schools. In May 1997, USTB was listed as one of the first group of universities admitted to China's "Project 211".

USTB is located in Haidian District of Beijing, faced Fourth Ring Road, where most key institutions of higher learning are gathered. The campus has an area of 629 000 square meters, with a floor space of 839 000 square meters.

USTB consists of 9 schools, provides 40 undergraduate programs, 109 master programs, 48 doctoral programs, 9 doctorate programs in first-level disciplines, 7 postdoctoral research fields and engineering master programs in 17 fields apart from MBA (including EMBA) and MPA.

In October 2006, USTB has the total enrollment of over 20 000 full time students, including 12 547 4 or 2 year undergraduates, 8 727 postgraduates (5 284 master candidates, 1 932 doctoral candidates, 1 511 postgraduates for disciplines degrees), 209 overseas students 7 233 adult-education students and 3 482 on-line learning students. USTB attaches great importance to the establishment and development of its academic disciplines. As a result of many years of development, seven national key disciplines have long enjoyed established fame both at home and abroad.

USTB prides itself a strong faculty known for their meticulous scholarship and academic excellence. There are 2 749 faculty and staff, including 1 412 full-time teachers, 330 full professors, 484 associate professors, 7 academicians of the Chinese Academy of Sciences (CAS) and 3 academicians of the Chinese Academy of

Engineering (CAE), 1 commissioner of the Degree Commission under the State Council, 16 state experts with outstanding contributions, 13 ministry experts with outstanding contributions, 8 special professors of "Cheungkong Scholars Program" and 11 recipients of the state funds of science and technology for outstanding youth.

Scientific researches in USTB focus on the solution of major scientific and technology problems in the modernization of metallurgical and materials production, as well as the development of new technology. USTB has 2 state key laboratories, 1 state engineering research center, 7 key laboratories set by ministries or commissions, 4 research centers set by ministries or commissions. The library has a total collection of 1.36 million items.

At the new century, University of Science and Technology Beijing has set the goal of its development. Namely it is determined to build USTB into a state-class and world-renowned research-orientated comprehensive university of its own characteristic with emphasis on engineering and harmonious development in engineering, science, management, humanities, economics and law.

北京化工大学
Beijing University of Chemical Technology

General Information

Beijing University of Chemical Technology (BUCT), founded in 1958, is a state key university affiliated to the Ministry of Education and is also one of the first group of universities admitted to "Project 211". As a result of the development in the past 48 years, BUCT has developed from an institution of scientific specialties to a comprehensive university with a solid foundation in science, great strength in engineering and full of characteristics in liberal arts, law, management and economics.

The university, covering an area of 64.4 hectares, is composed of three campuses. The main campus is conveniently located on the eastern section of the North Third Ring Road, southeast of the Asian Games Village, with a quiet and attractive environment. The west campus near the Shangri-La Hotel enjoys an advantageous location on the central section of the West Third Ring Road, and the north campus is in Changping District near the Ming Tombs, a famous scenic spot.

BUCT consists of 10 Schools—Chemical Engineering, Materials Science and Engineering, Mechanical and Electrical, Information Science and Technology, Economic Management, Science, Humanities and Law, Life Science and Technology, Further Education, and Vocational Education. More than 1 800 staff members are working on campus, including 7 academicians of the Chinese Academy of Sciences and the Chinese Academy of Engineering Sciences, and over 600 full and associate professors, and a great number of special professors of "Cheungkong Scholars

Program", middle-age experts with outstanding contributions at the national level, recipients of state outstanding youth funds.

There are 3 Postdoctoral Programs, 24 Ph. D. specialties, 50 Master Programs and 41 Bachelor program specialties offered in the university. Around 20 000 students are currently studying at BUCT including more than 3 700 for Master's or Doctoral degrees, 11 200 undergraduates, nearly 1 000 vocational students and over a hundred overseas students.

BUCT has paid great attention to scientific research and has a number of scientific research institutes with great strength, namely 1 national engineering and technology research center, 4 ministry-level key laboratories, 3 ministry-level engineering and technology centers.

The Library consists of three parts—the Yi Fu branch, the Rong Mao branch and the northern campus branch—and possesses 1 300 000 books and periodicals with an emphasis on chemistry and the chemical industry. The library subscribes to over 2 200 periodicals and 200 newspapers. The total area of the library is 26 600 square meters with more than 3 200 seats for readers. It is open for 90 hours per week. Electronic documents in the Library can be accessed by readers 24 hours a day.

In the new century, BUCT will continuously focus on training qualified personnel who not only have extensive knowledge, but also have a great sense of social

北京邮电大学
Beijing University of Posts and Telecommunications

General Information

Beijing University of Posts and Telecommunications (BUPT) is a state key and research-oriented university with information technology and telecommunications as its main feature. It offers a wide range of subjects including engineering, management, humanities and sciences, and most of its subjects and disciplines are related to applied science and engineering. Directly administered by the Ministry of Education, BUPT is one of the first group of universities that were listed in the "Project 211" Universities. Founded in 1955, BUPT was originally named Beijing Institute of Posts and Telecommunications. It was the first institute of higher learning for teaching and research in the fields of posts and telecommunications. BUPT enjoys a nationwide reputation for innovation and excellence in advanced research and learning in information and communication technology. It serves as one of the most important teaching and research bases for information technology and telecommunication industry in China.

The university, covering an area of 46 hectares, is located in Hi-Tech Development Zone of Haidian District, where most key institutions of higher learning are gathered, with a quiet and attractive environment.

BUPT offers 36 undergraduate programs, 41 postgraduate programs, two professional degrees—MBA and Master of Engineering, 14 doctoral programs and 4

post-doctorate stations in first-level disciplines. BUPT has 4 state key disciplines and 1 state key laboratory.

There are over 230 professors and 426 associate professors among the total of 1 066 faculty members, 135 of them are state experts enjoying government special allowance and especially Professor Ye Peida, senior academician of the Chinese Academy of Sciences (CAS), Professor Zhou Jiongpan, academician of the Chinese Academy of Engineering (CAE), Professor Chen Junliang, academician of both CAS and CAE and Professor Xu Daxiong, academician of the National Academy of Sciences of the Republic of Kirgizstan who are in the forefront of the outstanding professors.

Currently, BUPT has over 16 200 full-time students and 12 000 long-distance and E-learning students, among full-time students there are 10 800 undergraduate students, 4 650 master students and 805 doctoral students.

BUPT Library was established in 1955 with a floor space of about 13 000 square meters. BUPT's library houses 970 000 books, more than 3 000 kinds of periodicals dominated by those on posts, telecommunications & electronics. It has a relatively complete collection of world-famous books & periodicals on telecommunications, which can be rated as the first class in China. And BUPT is one of ten universities that took part in the initiation construction of "China Education and Research Network" (CERNET) in 1994. It also took part in the demonstrating project of the CERNET2, a model project of the next-generation Internet (NGI), which adopts the pure Ipv6 protocol. BUPT is a CERNET model project of campus network.

As a result of the development in the past over 40 years, BUPT has made great progress. The general goal of the university is to build itself into a state-class and world-renowned research-orientated state key university of multi-disciplines in the field of information.

offer 71 bachelor programs, 1 doctorate programs in first-level disciplines, 10 doctorate programs in second-level disciplines, 19 master's programs, as well as three post-doctoral stations.

The total number of students in CUC is more than 26 000, including 10 600 full-time undergraduates in 2 or 4 year programs, 1 980 master's degrees candidates and doctoral candidates, 9 000 students for distance education or night school education, 4 000 online learning students and 510 overseas students. As the cradle of China's high-level talents in radio, television, film and communication, CUC has trained around 60 000 graduates and about 340 000 on-the-job trainees over the past fifty years. Among them many are now holding key positions from leading officers to professionals and a number of renowned reporters, editors, announcers, anchors or presenters as well as movie directors, screenwriters, producers, translators and senior engineers.

CUC has a strong faculty team with 945 members, more than 50% of whom are professors and associate professors. Many of the scholars enjoy great fame both at home and abroad. Also, more than 100 experts and visiting scholars work here as specially-invited professors, guest professors and part-time professors.

CUC enjoys the leading position in the field of broadcasting research in China. It has over twenty-six academic research organizations such as National Centre for Radio and Television Studies, Journalism and Communication Institution, Radio and Television Technology Institution, International Advertising Research Institution, the Survey and Statistics Institution and IMI Market Information Institution, as well as National Mandarin Proficiency Test Center. Moreover, there are one state key research base of social sciences, three key research bases of social sciences at the ministry level and Two key laboratories of social sciences at the ministry level.

The motto of the University is "integrity, professionalism, erudition and competence". The educational philosophy of CUC is to "establish roots in the radio and TV system, build upon the media community, and open up the school to society". And now CUC has formed its own distinct characteristics. With the overall objective of building CUC into a first-rate, high-quality, world-renowned university with its distinctive features by the middle of this century, CUC will serve as a center of media talent training and talent information exchange, scientific research and technology development, information and literature collecting and distribution. Besides, it will also be a platform for communication content creativity and international exchange of communication education and co-operation.

复旦大学
Fudan University

General Information

Initially known as "Fudan Public School", Fudan University was founded in the year 1905. "Fudan", literally meaning "(heavenly light shines) day after day", indicates inexhaustible self-reliance and industriousness. After a century of construction, especially with the joint efforts of the Ministry of Education and

Shanghai Government, Fudan University has gradually developed into a multi-discipline, research-oriented, state key and comprehensive university of humanity science, social science, natural science, technical science and management science.

Located on the west coast of the Pacific, Fudan University lies in Shanghai, the most dynamic metropolis in China. It now occupies an area of 2.52 million square meters with a floor space up to 1.11 million square meters. Fudan University has 134 laboratories of all kinds, including 5 state key laboratories and 20 provincial or ministerial key laboratories.

Fudan University Library was formally established in 1922, previously known as the Reading Room of Wu Wu (the year 1918). Today it comprises the Liberal Arts Library, the Science Library and the Medical Library, with its total floor space being 29 000 square meters. There is a total collection of 4.45 million volumes, which ranks the first of all national universities.

Fudan consists of seventeen schools (which comprise sixty-six departments) and four independent departments. The University confers bachelor's degrees in sixty-eight academic disciplines, and master's degrees in two hundred and nine disciplines (with thirty-eight of them established by the University itself), and doc-

toral degrees in twenty-two academic disciplines of Level I and one hundred and thirty-five academic disciplines of Level II (with twenty-four of them established by the University itself). There are also twenty-five research stations that offer postdoctoral fellowships. Fudan now has an enrollment of 44 300 students of all kinds, including 3 500 doctoral candidates, 7 500 master's candidates, 15 700 undergraduates, 2 200 foreign students, 8 400 students of adult education and nearly 7 000 students of online education.

Fudan boasts a qualified faculty of over 2 300 full-time teachers and researchers, including 1 350 full professors and associate professors, 30 academicians of the Chinese Academy of Sciences and the Chinese Academy of Engineering, 746 doctoral advisors, 40 chair professors and 14 lecture professors of the "Cheungkong Scholars Program", 6 chief scientists of "Project 973" and 31 "Young and Middle-Aged Experts Nationally Acknowledged for Their Outstanding Achievements". In the recent years, the University has been proactive in recruiting youthful strengths and optimizing the echelon of its faculty. Fudan has nine teaching hospitals, such as Zhong-shan (Dr. Sun Yat-san) Hospital and Hua-shan Hospital, which offer quality medical service to the general public, conduct clinical education to student doctors and perform advanced scientific researches.

As one of the top universities in China, Fudan always adheres to its motto "Rich in knowledge and tenacious of purpose; inquiring with earnestness and reflecting with self-practice" with our efforts of education and innovation. In the academic, research and international activities, Fudan tries to realize three "I"s, namely, "Information, Internationalization, and Inter-discipline".

The single and solitary goal of Fudan is to cultivate more and more all-round talents for modern China. Emulating the other successful institutions of tertiary and quaternary education at home and abroad, the University has been carrying out a series of daring experiments to integrate the various disciplines of learning and to utilize the abundant resources of a comprehensive university. After years of exploring and practicing, Fudan has now established its own curriculum and management system, both of which are unique and progressively improving.

At the threshold of a new century and with the special funding from both the state Ministry of Education and Shanghai Government, Fudan University, has set its goal of building a world-renowned, research-oriented comprehensive university which is located in Shanghai while serving the whole country.

tion, the continuous education. The University has total student body of 20 621, including 1 266 master's degree students and 541 doctoral degree students. Since its founding over 70 years ago, NEU has trained more than 110 000 students, some of whom have emerged as academicians, leading experts, leaders at provincial or ministerial-level, managers of large-scale state-own enterprises, and outstanding people in the sectors of education, academy, industry, business, sports, culture.

Northeastern University attaches importance to international exchange. NEU has set up inter-university relations of academic exchange with over 102 universities and research from more than twenty countries and regions, including the US, Japan, Russia, UG, France, Italy, Germany, Republic of Korea, and Taiwan, Hong Kong. 1 893 foreign experts have been invited to NEU to teach, give lectures or conduct cooperative scientific research and 591 well-known scholars from home or abroad have been invited as either NEU honorary or concurrent professors. Over 1 800 faculty members have been sent abroad to receive advanced training, give lectures or conduct cooperative research so as to improve the level of the university's academic research. In recent years, over 20 large international conferences have been sponsored or organized by NEU.

Following the wave of the reform and openness in China, the University with a patriotic tradition and academic style of "devotion, reality, solidarity, and creativity" will make itself an excellent university of national and international recognition in the early 21st century, based upon the integration of education, research and business and aided by its convenient location in Northeastern Asia Economic Rim and the historic opportunity of "Project 211".

Glorious History

1923 Northeastern University was founded.

1931 The University was forced to drift successively to Beijing, Xi'an, Kaifeng and Santai in Sichuan Province.

1946 The University returned to its original location of Shenyang.

1949 Shenyang College of Industry was established based upon the School of Engineering, and partially upon the School of Science of Northeastern University.

1950 It was named Northeast University of Technology.

1993 It resumed the original name of Northeastern University.

学者为东北大学名誉教授和兼职教授;先后选派教师1 800余人次出国进修、讲学和科研合作,促进了学校学术水平的提高。近年来,东北大学先后主办并组织了20余场大型国际会议。

随着国家的改革开放,具有爱国传统的东北大学坚持"自强不息,知行合一"的校训,将抓住机遇,办出特色,为建成"多科性、研究型、国际化"的国内一流、国际知名的高水平大学而奋斗。

历史变迁

1923年 东北大学始建。

1931年 东北大学被迫先后迁徙北平、西安、开封、四川三台等地。

1946年 东北大学迁回沈阳原校址。

1949年 在东北大学工学院、理学院(部分)的基础上成立了沈阳工学院。

1950年 定名为东北工学院。

1993年 东北工学院复名为东北大学。

辽宁大学
Liaoning University

General Information

In the course of over half a century's development, Liaoning University has grown into a multiple-discipline comprehensive university, embracing Chinese language and literature, history, philosophy, economics, law, foreign languages, art, natural science, engineering and management. It is one of the state key "Project 211" universities.

One of its predecessors is Shenyang Commercial College set up by the People's Government of the Northeast in November, 1948. The September of 1958 saw the amalgamation of the Northeast Institute of Finance and Economics, Shenyang Normal College and Shenyang Institute of Russian, which led to the birth of Liaoning University. Marshal Zhu De wrote an inscription of the school name for the University.

The University is situated in Shenyang City, the capital of Liaoning Province, and at present it has an area of 143 hectares, i. e. 1 420 000 square meters (including the University proper, Liaoyang Foreign Languages College and the Xinchengzi

Campus), with a building area totaling 615 000 square meters.

The University has 18 colleges, and has 62 undergraduate disciplines, 110 master-degree-granting disciplines, including MBA, MPA and JM. The University is also invested with authority to grant 3 doctorates of theoretical economics, applied economics, business administration in the first level disciplines and 33 doctorates in the second level disciplines. Furthermore, the University has 3 mobile stations for post-doctoral studies to its credit, with 2 national key disciplines of world economy and national economy in addition to a base for cultivating personnel of basic national economy, and a key base for research on humanities, and a center of research on the system of comparative economy as designated by the Ministry of Education. The University has 11 province-level key disciplines, 5 province-level key bases of scientific research and 2 province-level key laboratories.

At present, Liaoning University has a teaching body of 1 170 full-time faculty members, among whom there are 181 professors, 417 associate professors, 52 doctorate supervisors, 1 special professors of "Cheungkong Scholars Program", 88 recipients of special subsidies from the State Council, 4 teachers selected by national "Millions of Talents Program", 2 teachers awarded the honor of "State Outstanding College Lecturers", 1 State Model Lecturer, 1 State Excellent Lecturer, 1 middle-age expert with outstanding contributions at the national level and 1 awarded the honor of Young Lecturer of High Learning by the Ministry of Education.

The University has a total of nearly 25 000 students of different kinds, including nearly 20 000 undergraduate students, nearly 3 500 graduate students, 500 foreign students and 1 000 students of other kinds.

The University's library with its 42 000 square meter building area, equipped with modern advanced facilities, is stocked with over 2.34 million volumes, including over 300 kinds of rare and treasured books, which are affirmed by the United Nation as the exclusive possessions of the University's library. The University also has a history museum and a museum of natural history. They have a collection of over two thousand pieces of art treasures and eleven thousand pieces of biological

Dalian Maritime University

General Information

Dalian Maritime University (DMU) is one of the largest and best maritime universities. It is a key maritime institution under the Ministry of Communications. DMU's high international reputation as an excellent center of maritime education and training has been recognized by the International Maritime Organization (IMO).

教育资源 www.222b.com 公众号:铅笔钥匙

The long history of the University can be traced back to 1909, when the Nanyang Institute in Shanghai established a Shipping Management Section. In 1960, DMU was designated a national key institution of higher education. Later in 1983, the Asia-Pacific Region Maritime Training Center was established at DMU by the United Nations Development Program (UNDP) and the IMO, and in 1985, a branch of the World Maritime University (WMU) was established. In 1998, the University was awarded the ISO9001 Certificate of Quality Assurance accredited by the Norwegian Det Norske Veritas (DNV) and the China Maritime Safety Administration (MSA); it became the first maritime university in China to have the ISO9001 Certificate. On August 22nd and October 20th in 1993, the Chinese Government leaders, former President Jiang Zemin, Vice President Zeng Qinghong, Premier Wen Jiabao, and Vice Premier Li Lanqing, respectively, inspected DMU. Former President Jiang wrote a few words of encouragement for DMU: "Be steadfast, rigorous, industrious, and pioneering in order to build the University into one of the preeminent maritime universities in the world."

DMU is located in southwestern Dalian which is a famous coastal city in northeastern China with a population of six million. The University covers an area of 1.13 million square meters with about half a million square meters occupied by buildings. The University owns buildings for maritime sciences that contain fully functional equipment and facilities. There are additional buildings for maritime training and research, survival training, a swimming pool, a planetarium and libraries. DMU has a training dock and over 40 laboratories for teaching, training and research; there is a full mission ship-handling simulator and an engine room simulator. DMU also owns and operates an ocean-going training vessel of over 10 000 deadweight tonnage.

教育资源 www.222b.com 公众号：铅笔钥匙

The University consists of 13 colleges. Presently DMU has 42 undergraduate programs, 2 first-class doctoral programs, 12 second-class doctoral programs, 7 first-class master's degree programs and 59 second-class master's degree programs. The University is authorized to confer MBA, MPA, J. M, and Master of Engineering, an on-the-job master's degree. Transport Engineering first-class discipline has a post-doctoral R & D base. Both the Traffic Information Engineering and Control and Marine Engineering are national key disciplines.

The current student number has risen to approximately 17 000. Since the amalgamation, DMU has educated and trained nearly 50 000 advanced professionals and technical authorities for the country. Many of them are now playing essential roles in maritime and maritime-related industries both in and outside of China. Additionally, our university enrolls overseas students for Bachelor's and Master's Degrees and PhDs. More than 4 000 overseas students and advanced professionals from over 30 countries and regions have been educated and trained at DMU.

DMU has a highly qualified faculty which is comprised of 192 professors, more than 100 doctoral supervisors, 5 first-class discipline leaders, 42 second-class discipline leaders, 96 academic leaders and a large number of excellent young faculty staff members. The team of young specialists and professors is well equipped in profound theoretical knowledge and capable of extensive research in the fields of marine traffic engineering, maritime information engineering, artificial intelligence application onboard vessels, ship power systems and energy-saving technology, marine engine repairing, communication and information systems, marine environmental protection, and maritime law.

Facing the future with its new opportunities and challenges, DMU will continue to bear in mind its mission statement, "be steadfast, rigorous, industrious, pioneering". It is determined to focus on our mission by exploring and grasping exciting opportunities, creatively addressing new challenges and, with multiple disciplines for research and education, DMU will achieve its goal of upgrading the University to a position of preeminence among the world's maritime universities.

Glorious History

1909 Shipping Management Section of the Nanyang Institute in Shanghai, the precedessor of DMU, was established.

1953 Dalian Marine College was created through the amalgamation of three merchant marine institutions: Shanghai Nautical College, the Northeast Navigation College and Fujian Navigation School.

Glorious History

The University dates back to 1902 when Sanjiang Normal School was founded, and then evolved as Liangjiang Normal School, Nanjing Higher Normal School, National Southeast University, the Fourth Zhongshan University, and National Central University. On August 8, 1949, the National Central University was renamed National Nanjing University. In October 1950, as required by the Ministry of Education, the name was changed to Nanjing University. In 1952, when a nationwide readjustment of universities took place, some schools, such as the School of Engineering and the School of Agriculture, were separated from the University; meanwhile, the University merged with the School of Liberal Arts and the School of Sciences of the University of Nanking, which was founded in 1888. The new university remained Nanjing University and the campus of Nanjing University moved from Sipailou to Gulou.

Zhenjiang campus. The new campus, Jiangning, which is under construction, covers an area of 163 hectares. Its overall construction area is 670 000 square meters.

CPU consists of 10 schools and departments, 6 research institutes and 7 research centers. CPU offers 15 four-year undergraduate specialties as well as 26 master's programs, 23 doctoral programs and 1 post-doctoral program with 6 disciplines that are approved by the Academic Degree Commission of the State Council. There are three key national disciplines: Pharmaceutical Chemistry, Pharmacognosy, Pharmaceutics and one key provincial discipline—Modern Traditional Chinese Pharmacy and Pharmacognosy. CPU is the only institution that is authorized by the Ministry of Education to admit regular students of pharmaceutical sciences, continuing education students and senior visiting scholars from overseas. It is also one of the educational institutions in the mainland for students from Hongkong, Macao and Taiwan.

The university boasts a team of high-qualified professors and pharmaceutical experts. There are more than 1 400 faculty members, including 610 full time teachers. 40 percent of them own advanced academic titles and 45 percent of them have master degrees or higher degrees. There are one academicians from the Chinese Academy of Sciences and the other from the Chinese Academy of Engineering, 60 doctoral supervisors, 122 master supervisors, 51 teachers enjoying government special allowance.

The total number of postgraduates reaches to 1 380 and nearly one third of them are doctoral candidates. There are over 7 500 full time undergraduates in the four or three year studies and over 11 000 students of adult education.

CPU operates under the guiding spirit of being "strict, practical, creative and cooperative". The students graduated from CPU have been devoting spirit, a wide range of knowledge and highly quality. For many years, the students have enjoyed a reputation from the society and the employers. The employment rate tops among the higher institutions in Jiangsu Province. The employment rate of the year 2003 graduates reached 99.74%, with 100% for post-graduate students, 99.8% for undergraduate students and 99.33% for students from vocational school.

Southern Yangtze University

General Information

Southern Yangtze University (SYTU) is one of China's key universities of "Project 211" and functions directly under the Ministry of Education. With its profound cultural origin, the roots of the university date back to the year of 1902 when its predecessor San Jiang Normal School began its first term. More than a hundred years of construction and development has made SYTU a famous comprehensive university with profound disciplines covering engineering, science, literature, economics, management, law, agriculture and education.

SYTU is located by the Lake of Taihu—a national scenery resort in the south of Wuxi, Jiangsu Province. The newly constructed university campus covers 208 hectares. It was designed and built with the concept of "Eco-campus", landscaped with beautiful greens, elegant gardens, unique bridges and tranquil streams. The completion of the whole campus construction is sure to provide the university a brand new stage to achieve a faster and sustainable development in near future.

The University Library has 1. 86 million books and 1. 28 million electronic books.

SYTU consists of 18 schools and departments offering 60 specialties for undergraduate studies. It is entitled to confer master degrees in 59 programs, 2 doctoral programs in the first level, 13 doctoral programs in the second level and 2 post-doctor stations. There are 6 national and provincial key disciplines and a "National Talent Cultivation Base of Bioscience & Technology" together with 11 national and

provincial key labs and research centers.

Now there are over 19 400 full-time undergraduates, 3 500 graduate students, 5 600 students for adult education or continual education, and 350 international students studying in the campus.

SYTU has a strong faculty team with excellent academic capability. Among 1 612 full-time faculty members, there are 3 academicians of China Academy of Engineering, 1 professor specially invited on "Cheungkong Scholars Program", 1 recipient of National Outstanding Youth Foundation, 2 teachers selected into the national "Millions of Talents program" of the first level, 3 State Young and Middle-age Experts with Outstanding Contributions and 9 recipients of Cross Century Talents Foundation under the Ministry of Education. The number of full and associate professors reaches up to nearly 700.

Southern Yangtze University adheres to its Motto of "Diligent in learning and committed to doing till you are a perfect being" and with its centennial achievements of several distinguishing disciplines, is now striving for even greater success in the new century to become a high level comprehensive university of global reputation.

南京航空航天大学
Nanjing University of Aeronautics and Astronautics

General Information

Nanjing University of Aeronautics and Astronautics (NUAA) was established in October 1952. After more than fifty years of development, NUAA has evolved from a teaching-oriented university to a research-oriented university. Currently administrated by the Commission of National Defense, Science, Technology and Industry, NUAA is a national key university that focuses on science and engineering. It enjoys a well-balanced development of multiple disciplines in modern engineering and technology, management sciences, natural sciences, humanities and social sciences with the characteristics of aeronautics, astronautics and civil aviation. In 1996, NUAA successfully entered the "Project 211" and in 2000, it was authorized by the Ministry of Education to establish the graduate school.

教育资源 www.222b.com 公众号:铅笔钥匙

NUAA has two campuses, namely Minggugong Campus and Jiangjunlu Campus, covering an area of 187 hectares with a building floor space of 720 000 square meters. The library has a collection of over 2.96 million volumes.

NUAA consists of 12 colleges and 68 research institutes. Up to now NUAA has set up 51 laboratories including 1 National Key Laboratory, 9 ministerial Key Laboratories, 1 National Teaching Base for Electrical Engineering and Electronics.

NUAA offers a wide range of programs including 41 undergraduate programs, 10 doctor programs in the first level, 52 doctor programs in the second level, 127 master programs and 9 post-doctoral research stations. There are 3 national key disciplines (Aircraft Design, Mechanical Engineering & Automation, and Engineering Mechanics), 8 ministerial key disciplines(Fluid Mechanics, Tele-Communication & Information systems, Technology of Micro Air Vehicles, etc), 7 provincial key disciplines (Mechanical Engineering & Automation, Aerospace Propulsion Theory & Engineering, Navigation Guidance & Control, Power Electronics & Power Transmission, Computer Technology & Application).

Now the total number of registered students is 24 500. Among them 14 800 are undergraduates, 3 700 postgraduates, 111 overseas students and 5 900 part-time students.

NUAA has a staff of 2 839, among whom 1 398 are full-time faculty members

and researchers, 182 Ph. D. supervisors, 226 full professors, 314 associate professors. Among the full professors, there are 2 academicians of Chinese Academy of Sciences, 8 academicians of both Chinese Academy of Sciences and Chinese Academy of Engineering, 3 members of the Subject Assessment Division, Degree Appraisal Committee of the State Council, 21 national or provincial young and middle-age experts with outstanding contributions, 3 professors invited on "Cheungkong Scholars Program", 1 awarded the honor of "Outstanding College Lecturers", 8 teachers selected by national "Millions of Talents program", 10 recipients of "Cross Century Talents Foundation" under the Ministry of Education, 33 teachers selected by Jiangsu Province in "333 Talents Project" and 49 in "Qinglan Project", and 133 experts enjoying government special allowance.

Since the reform and opening-up, NUAA has sped up its management reform with more support from the central and local governments. It has cooperated with the Headquarters of the General Staff, the General Equipment Commission, various armed force and military industries, as well as CAAC and its subsidiaries. At the same time, NUAA has maintained close ties with more than 50 overseas universities and enterprises. Based on all these, NUAA has formed a new pattern of development with special focus on national defense.

Turning from a teaching-oriented university to a research-oriented university, NUAA decides to implement the strategy of "relying on faculty and students, giving full play to potentials, highlighting feature, accelerating development". Faced with new challenge and opportunities and motivated by the motto of "cooperation, economical, practical and creative", the administration, faculty and students are determined to build NUAA into a first-class, research-oriented university with its characteristic of national defense.

General Information

Zhejiang University is a state key university with a long history and under the direct administration of China's Ministry of Education. Qiushi Academy, the predecessor of Zhejiang University, was founded in 1897 and is one of the earliest institutions of higher learning ever established in China. Reputed as "the East Cambridge" in history, it has always been ranked among the few top universities in China in terms of its comprehensive academic strength showed in teaching, research and social service. In September 1998, a new Zhejiang University was established on the basis of the amalgamation of the four former individual universities, namely Zhejiang University, Hangzhou University, Zhejiang Agricultural University and Zhejiang Medical University, which were all located in the garden city of Hangzhou. After more than one hundred years of construction and development, Zhejiang University has become a national first-rate and world-renowned, research-oriented comprehensive university with solid foundation, strong potentials and its own distinctive features. It is also one of the first group of universities in national "Project 211" and "Project 985".
